**Computational Methods and Geomechanics** Shenghong Chen,2023-01-01 The aim of this book is intended through

parallel expounding to help readers comprehensively grasp the intrinsic features of typical advanced computational methods. These methods are created in recent three decades for the understanding of the post failure of geo materials accompanied with discontinuous and finite deformation dislocation as well as the violent fluid structure interaction accompanied with strong distortion of water surface. The strong points and weak points of the formalisms for governing equations, the discretization schemes, the nodal interpolation approximation of field variables and their connectivity via support domains, covers or enrichments, the basic algorithms etc are clarified. Being aware of that the differences in these methods are not so large as at the first glance, this book will help readers to select appropriate methods to improve the methods for their specific purpose and to evaluate the reliability applicability of the outcomes in the hazard evaluation of geotechnical hydraulic structures beyond extreme work situation. This book may be looked at as an advanced continuation of *Computational Geomechanics and Hydraulic Structures* by the author. 2018 Springer Verlag ISBN 978 981 10 8134 7 which elaborates the fundamental computational methods in geomechanics for the routine design of geotechnical hydraulic engineering.

The 4th International Conference on Performance based Design in Earthquake Geotechnical Engineering PBD IV is held in Beijing China. The PBD IV Conference is organized under the auspices of the International Society of Soil Mechanics and Geotechnical Engineering Technical Committee TC203 on Earthquake Geotechnical Engineering and Associated Problems ISSMGE TC203. The PBD I, PBD II and PBD III events in Japan 2009, Italy 2012 and Canada 2017 respectively were highly successful events for the international earthquake geotechnical engineering community. The PBD events have been excellent companions to the International Conference on Earthquake Geotechnical Engineering ICEGE series that TC203 has held in Japan 1995, Portugal 1999, USA 2004, Greece 2007, Chile 2011, New Zealand 2015 and Italy 2019. The goal of PBD IV is to provide an open forum for delegates to interact with their international colleagues and advance performance based design research and practices for earthquake geotechnical engineering.
