A Teacher's Guide to Using the Common Core State Standards With

Mathematically Gifted and Advanced Learners National Assoc For Gifted Children, Gail R. Ryser, Susan Assouline, 2021-09-23

A Teacher's Guide to Using the Common Core State Standards in Mathematics provides teachers and administrators with practical examples of ways to build a comprehensive coherent and continuous set of learning experiences for gifted and advanced students. It describes informal traditional off level and 21st century math assessments that are useful in making educational decisions about placement and programming. Featuring learning experiences for each grade within one math progression, the book offers insight into useful ways of both accelerating and enriching the CCSS mathematics standards. Each of the learning experiences includes a sequence of activities, implementation examples, and formative assessments. Specific instructional and management strategies for implementing the standards within the classroom, school, and school district will be helpful for both K-12 teachers and administrators.

Prioritizing the Common Core Larry Ainsworth, 2013

The consensus among educators nationwide is that in-depth instruction paired with focused assessment of essential concepts and skills are far more effective than superficially covering every concept and skill in the standards. Educators are faced with the task of teaching all standards while meeting the extraordinary range of student learning needs. *Prioritizing the Common Core* offers common sense solutions to the dilemmas teachers face today in implementing the new more rigorous national standards. Chapters present a rationale for prioritizing the Common Core, a step-by-step process for prioritizing standards in language arts and mathematics, strategies for soliciting feedback and input from everyone in the district or school prior to the final determination of the Priority Standards, and detailed summaries of the process schools in six different districts used to identify their Priority Standards with accompanying commentary by those who directed the work.

ReWRITING the Basics Anne Haas Dyson, 2013

What are the real basics of writing? How should they be taught and what do they look like in children's worlds? In her new book, Anne Haas Dyson shows how highly scripted writing curricula and regimented class routines work against young children's natural social learning processes. Readers will have a front row seat in Mrs. Bee's kindergarten and Mrs. Kay's 1st grade class where these dedicated teachers taught writing basics in schools serving predominately low-income children of color. The children, it turns out, had their own expectations for one another's actions during writing time. Driven by desires for companionship and meaning, they used available linguistic and multimodal resources to construct their shared lives. In so doing, they stretch, enrich, and ultimately transform our own understandings of the basics. *ReWRITING the Basics* goes beyond critiquing traditional writing basics to place them in the linguistic diversity and multimodal texts of children's everyday worlds. This engaging work illustrates how scripted uniform curricula can reduce the resources of so-called at-risk children. Provides insight into how children may situate writing within the relational ethics and social structures of childhood cultures. Offers guiding principles for creating a program that will expand children's possibilities in ways that are compatible with human sociability. Includes examples of children's writing, reflections on research methods, and demographic tables. Dyson's ethnographies offer new ways of thinking about writing time and remind

us of the importance of play talk and social relationships in children s literacy learning If every literacy researcher could write like Dyson teachers would want to read about research If policymakers took her insights on board classrooms might become more respectful and enjoyable spaces for literacy teaching and learning that soar way above the basics Barbara Comber Queensland University of Technology Australia
