**Advanced Automation for Tree Fruit Orchards and Vineyards** Stavros G. Vougioukas, Qin Zhang, 2023-05-23 Modern tree fruit orchards and vineyards constitute complex production systems that are exposed to highly dynamic and stochastic natural financial and societal forces and face demands for increased production using fewer resources with reduced environmental impact Successful operation of orchards and vineyards under these conditions is practically impossible without careful and extensive use of state of the art automation technologies and careful planning of future operations e g training systems when replanting that can be enabled by knowledge of emerging technologies and future trends Also improvement of existing automation technologies and development of novel future systems cannot be accomplished without a working understanding of the tree and vine biological production systems their management needs and the capabilities and limitations of existing automation systems The book aims to provide the necessary knowledge to achieve the above goals in a way that can engage readers without engineering or horticultural backgrounds

**Exploring Occupant Behavior in Buildings** Andreas Wagner, William O'Brien, Bing Dong, 2017-10-27 This book is the first to comprehensively cover research methods for building occupant behavior As this is of growing importance for building design and for building performance optimization the book aims to provide a sound scientific basis for experimental studies in this field It introduces the reader to fundamental questions about the topic and unfolds the different fields related to occupant actions and comfort This is followed by more general questions about developing an appropriate research method and experimental design A comprehensive overview of sensors for monitoring environmental and also behavioral and action related quantities helps to set up an experiment In this context different experimental environments and data collection methods in situ laboratories surveys are introduced and discussed in terms of their suitability for the respective research question Furthermore data management and reporting is addressed The book concludes with fundamental challenges in conducting occupant studies with chapters on ground truth ethics and privacy

**Advances in Safety Management and Human Factors** Pedro Arezes, 2017-06-22 This book discusses the latest findings on ensuring employees safety health and welfare at work It combines a range of disciplines e g work physiology health informatics safety engineering workplace design injury prevention and occupational psychology and presents new strategies for safety management including accident prevention methods such as performance testing and participatory ergonomics The book which is based on the AHFE 2017 International Conference on Safety Management and Human Factors held on July 17 21 2017 in Los Angeles California USA provides readers including decision makers professional ergonomists and program managers in government and public authorities with a timely snapshot of the state of the art in the field of safety health and welfare management It also addresses agencies such as the Occupational Safety and Health Administration OSHA and the National Institute for Occupational Safety and Health NIOSH as well as other professionals dealing with occupational safety and health

Simon Sherratt,Nilanjan Dey,Amit Joshi,2024-12-17 This book gathers selected high quality research papers presented at the Ninth International Congress on Information and Communication Technology held in London on February 19 22 2024 It discusses emerging topics pertaining to information and communication technology ICT for managerial applications e governance e agriculture e education and computing technologies the Internet of Things IoT and e mining Written by respected experts and researchers working on ICT the book offers an asset for young researchers involved in advanced studies The work is presented in ten volumes **Gearing Up and Accelerating Cross-fertilization between Academic and Industrial Robotics Research in Europe:** Florian Röhrbein,Germano Veiga,Ciro Natale,2013-11-23 This monograph by Florian R hrbein Germano Veiga and Ciro Natale is an edited collection of 15 authoritative contributions in the area of robot technology transfer between academia and industry It comprises three parts on Future Industrial Robotics Robotic Grasping as well as Human Centered Robots The book chapters cover almost all the topics nowadays considered hot within the robotics community from reliable object recognition to dexterous grasping from speech recognition to intuitive robot programming from mobile robot navigation to aerial robotics from safe physical human robot interaction to body extenders All contributions stem from the results of ECHORD the European Clearing House for Open Robotics Development a large scale integrating project funded by the European Commission within the 7th Framework Programme from 2009 to 2013 ECHORD s two main pillars were the so called experiments 51 small sized industry driven research projects and the structured dialog a powerful interaction instrument between the stakeholders The results described in this volume are expected to shed new light on innovation and technology transfer from academia to industry in the field of robotics Biomechanical Analysis of Nursing Tasks for Physical Relief by Collaborative Robotics Anna Brinkmann,2023-06-14 Musculoskeletal disorders are among the most

significant health risks contributing to the global decline in mental health and physical performance Occupations with high physical work demands such as patient handling in nursing are associated with high rates of long term absenteeism and disability due to musculoskeletal pain and disorders Robotic assistance systems are revolutionizing bedside care and could provide a healthy future for caregivers For the first time the potential of a collaborative robotic system to assist nurses in a manual patient handling scenario has been quantified Using the system significantly reduced the maximum effort required resulting in physical relief It demonstrates the feasibility of robot assisted patient repositioning and highlights the need for interdisciplinary research to adaptively respond to the individual needs and functional abilities of nurses This work provides a foundation for future research and practical implementation The use of robotics is innovative contemporary widely applicable and promising for reducing existing risk factors in nursing care

*Advances in Metrology and Measurement of Engineering Surfaces* Chander Prakash,Grzegorz Krolczyk,Sunpreet Singh,Alokesh Pramanik,2020-06-15 This book presents the select proceedings of the International Conference on Functional Material Manufacturing and Performances ICFMMP 2019 The book covers broad aspects of several topics involved in the metrology and measurement of engineering surfaces and their implementation in automotive bio manufacturing chemicals electronics energy construction materials and other engineering applications The contents focus on cutting edge instruments methods and standards in the field of metrology and mechanical properties of advanced materials Given the scope of the topics this book can be useful for students researchers and professionals interested in the measurement of surfaces and the applications thereof
