Connection

The transmitter is supplied with AC power cord. Proceed as follows to complete all necessary connections to the transmitter.

1. Your transmitter has two standard antenna connectors of type SO-239 located on rear panel. For easy connection to standard PL-259 coax plugs. Use only enough cable to suit your needs. This will insure a proper impedance match and maximum power transfer from the transmitter to the antenna. If the coax antenna cable must be made longer, use coax cable with high efficiency and quality such as type RG 8/U.
2. AC Power Operation: Use 220 volts AC power for base station operation. Plug AC power cord into a working 220 volts household outlet.

Noise Interference

There are several kinds of noise interfering with many transmitters in base station operation. Some of these noise sources are: fluorescent light, nearby commercial broadcast, electrical appliances, powerlines, and electrical storms, etc. Commercial products are available to reduce interference from these sources. Consult your dealer or OEM/factor dealer supply shops.

Antennas

Ham International has designed a high power antenna for best performance in local and DX use with large bandwidth for equal quality on 120 channels. The Supersat.

Remote Speaker

The external speaker (ext. SP) on the rear panel is used for remote receiver monitoring. The external speaker should have 8 ohm impedance and be able to handle at least 3 watts. When the external speaker is plugged in, the internal speaker is disconnected.
