Clinical Gerontology Terry L. Brink, 1986 Here is a major text in psychogeriatrics for all professionals in the field of aging and mental health Leading authorities provide valuable insights into assessment and intervention techniques for use with the mentally impaired elderly Topics include a depression scale for use in later life family therapy therapy in later life and various issues concerning mental health care for the aged *International Handbook of Behavior Modification and Therapy* Alan S. Bellack, Michel Hersen, Alan E. Kazdin, 2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders
