Samson, Mirko Uljarevic, 2024-08-12 Emotion regulation allows people to influence and modify the intensity duration and types of emotions experienced and how these emotions are expressed The capacity to regulate emotions increases and becomes more sophisticated throughout child development due to the maturation of prefrontal brain regions involved in executive functioning Emotion regulation is a transdiagnostic process that plays a pivotal role in the development and maintenance of internalizing and externalizing symptoms such as anxiety depression or problematic behaviors Emotion dysregulation is a prominent feature of neurodevelopmental conditions such as autism spectrum disorder ASD and attention deficit hyperactivity disorder ADHD Furthermore emotion dysregulation has been suggested to play a vital role in less commonly diagnosed neurogenetic disorders such as Phelan McDermid Syndrome germline heterozygous PTEN mutations and 22q11.2 deletion syndrome Fortunately emotion regulation processes are amenable to treatment in various clinical and non clinical populations *The Cambridge Handbook of Substance and Behavioral Addictions* Steve Sussman, 2020-08-06 Written by leaders in the addictions field 100 authors from six countries this handbook is a thoroughly comprehensive resource Philosophical and legal issues are addressed while conceptual underpinnings are provided through explanations of appetitive motivation incentive sensitization reward deficiency and behavioral economics theories Major clinical and research methods are clearly mapped out e.g. MRI behavioral economics interview assessments and qualitative approaches outlining their strengths and weaknesses giving the reader the tools needed to guide their research and practice aims The etiology of addiction at various levels of analysis is discussed including neurobiology cognition groups culture and environment which simultaneously lays out the foundations and high level discourse to serve both novice and expert researchers and clinicians Importantly the volume explores the prevention and treatment of such addictions as alcohol tobacco novel drugs food gambling sex work shopping the internet and several seldom investigated behaviors e.g. love tanning or exercise **Assistive Technology Assessment Handbook** Stefano Federici, Marcia Scherer, 2017-11-23

Assistive Technology Assessment Handbook Second Edition proposes an international ideal model for the assistive technology assessment process outlining how this model can be applied in practice to reconceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence based practice guiding both public and private centers that wish to compare, evaluate and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology GATE initiative whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook gives readers a toolkit for performing assessments, describes the roles of the assessment team members among them the new profession of psychotechnologist and reviews technologies for rehabilitation and independent living including brain computer interfaces, exoskeletons and technologies for music therapy. Edited by Stefano Federici and Marcia J Scherer, this cross cultural handbook includes contributions from leading experts across five continents offering a framework for future practice and research.

**Handbook of Child Psychology and Developmental Science, Cognitive Processes**, 2015-04-06. The essential reference for human development theory, updated and reconceptualized. The Handbook of Child Psychology and Developmental Science, a four volume reference, is the field defining work to which all others are compared. First published in 1946 and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 2, Cognitive Processes, describes cognitive development as a relational phenomenon that can be studied only as part of a larger whole of the person and context relational system that sustains it. In this volume, specific domains of cognitive development are contextualized with respect to biological processes and sociocultural contexts. Furthermore, key themes and issues, e.g. the importance of symbolic systems and social understanding, are threaded across multiple chapters, although every chapter is focused on a different domain within cognitive development. Thus, both within and across chapters, the complexity and interconnectivity of cognitive development are well illuminated. Learn about the inextricable intertwining of perceptual development, motor development, emotional development and brain development. Understand the complexity of cognitive development without misleading simplification, reducing cognitive development to its biological substrates or viewing it as a passive socialization process. Discover how each portion of the developmental process contributes to subsequent cognitive development. Examine the multiple processes such as categorizing, reasoning, thinking, decision making and judgment that comprise cognition. The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period. There is a paradigm shift that involves increasingly greater understanding of how to describe, explain and optimize the course of human life for diverse individuals living within diverse contexts. This Handbook is the definitive reference for educators, policy makers, researchers, students and practitioners in human development, psychology, sociology, anthropology and neuroscience.
