*"This book offers a fabulous synthesis and distillation of the latest work on physiological research methods in health psychology. It will undoubtedly result in greater efficiency, sophistication, and precision for anyone conducting research in this area. Without question, it's a must-read for all those engaged in health psychology research."*

—M. David Rusk  
Texas Tech University

The *Handbook of Physiological Research Methods in Health Psychology* provides a comprehensive overview of the collection, analysis, and interpretation of physiological measures that are commonly used and broadly relevant to researchers interested in a biopsychosocial model of health and well-being. Editors Linda E. Luecken and Linda C. Gallo offer wide representation of physiological systems and markers of health and disease risk that are pertinent to health psychology and many related disciplines. Written without jargon, this volume assumes little or no prior knowledge of physiological systems or assessment. It can be thought of as a primer, or gateway reference, for individuals who are new to the area of physiological measurement.

## KEY FEATURES

- *Offers recommended practices for measurement:* Helping to set standards of measurement in the field, this is the first book to provide concrete advice on study design issues and the best methods for collection.
- *Provides statistical analyses of physiological measures:* Contributors advise readers on current methods for statistically analyzing the physiological measure, including methods for identifying artifacts and outliers, and discuss other current techniques.
- *Addresses future directions and promising physiological measures important in research:* Chapters conclude with thoughts on future directions and suggested readings for those interested in more extensive coverage of clinical or research applications.

## INTENDED AUDIENCE

This is an important resource for graduate students and researchers studying Behavioral Medicine Assessment, Research Methods in Health Psychology, and Research Methods in Health in departments of psychology, nursing, and public health.
