## **Infinity And The Brain A Unified Theory Of Mind Matter And God:**

**Infinity and the Brain** Glenn G. Dudley, 2002-08-21 Infinity and the Brain proposes a logical and scientific way to resolve the paradox of mind and matter by explaining how the perception of a finite image is dependent upon the contrasting infinitude of God The theory holds that awareness is equal to a tension between existence and nonexistence such that the self is illuminated to itself becomes conscious to the exact measure that it anticipates the infinitude of its own nonexistence This anticipation is actually a tendency toward a loss of structure in accordance with the second law of thermodynamics a process that is restrained by effort and the consequent wholeness of an image An understanding of how effort is linked to an image and how both are dependent upon neural systems inseparable from infinity anticipation sets the stage for a new worldview in which mind is seen as dependent upon the immanence of an infinite God And because mind can be defined by the presence of an image which intrinsically restrains disorder we see by extrapolation that the entire universe must be fundamentally personal not objective as currently viewed by modern science Book jacket

**Foundations of Spirituality** Carla Mae Streeter, 2013-01-01 How does the Holy come to meet the human Or said another way how does God work with the physical psychic and spiritual persons that each of us are Scholarly approaches to spirituality often overlook the need for a sound anthropology as the base for explaining conversion the dynamic of grace and the effects of conversion in virtue theory In Foundations of Spirituality longtime educator Carla Mae Streeter provides a more adequate account of what it means to be a person before God By mining the insights of Bernard Lonergan on human consciousness and the virtue theory of Thomas Aquinas she presents a clear and integrated incarnational spirituality Streeter argues that God works with precisely what God has made enhancing it rather than overriding or disposing of it The basic premise of this book is that every person is called to holiness which comes about through the relationship of the human with the Divine It is a divine summons heard and responded to by a human being Carla Mae Streeter OP is professor emerita at the Aquinas Institute of Theology in St Louis Missouri where she continues to teach in the areas of systematic theology and spirituality

**Physics Of Reality, The: Space, Time, Matter, Cosmos - Proceedings Of The 8th Symposium Honoring Mathematical Physicist Jean-pierre Vigier** Richard L Amoroso, Louis H Kauffman, Peter Rowlands, 2013-09-18 A truly Galilean class volume this book introduces a new method in theory formation completing the tools of epistemology It covers a broad spectrum of theoretical and mathematical physics by researchers from over 20 nations from four continents Like Vigier himself the Vigier symposia are noted for addressing avant garde cutting edge topics in contemporary physics Among the six proceedings honoring J P Vigier this is perhaps the most exciting one as several important breakthroughs are introduced for the first time The most interesting breakthrough in view of the recent NIST experimental violations of QED is a continuation of the pioneering work by Vigier on tight bound states in hydrogen The new

experimental protocol described not only promises empirical proof of large scale extra dimensions in conjunction with avenues for testing string theory but also implies the birth of the field of unified field mechanics ushering in a new age of discovery Work on quantum computing redefines the qubit in a manner that the uncertainty principle may be routinely violated Other breakthroughs occur in the utility of quaternion algebra in extending our understanding of the nature of the fermionic singularity or point particle There are several other discoveries of equal magnitude making this volume a must have acquisition for the library of any serious forward looking researchers
