

Basic Infusion Time Formula

- Infusion Time = $\frac{\text{total volume to infuse}}{\text{ml/hr being infused}}$

“How long will it take for a particular amount of solution to be completed?”

Ex: Calculate the infusion time for an IV solution of 500 ml D5W that is currently infusing at 50 ml/hr?

$$\frac{500 \text{ ml}}{50 \text{ ml/hr}} = 10 \text{ hrs}$$

OR by ratio

$$\frac{50 \text{ ml}}{1 \text{ hr}} = \frac{500 \text{ ml}}{x} \quad (\text{cross multiply \& solve for } x)$$

$$50x = 500$$

$$x = 10 \text{ hrs}$$

Mathematics in Industrial Problems Avner Friedman, 2012-12-06 Building a bridge between mathematicians and industry is both a challenging task and a valuable goal for the Institute for Mathematics and its Applications IMA The rationale for the existence of the IMA is to encourage interaction between mathematicians and scientists who use mathematics Some of this interaction should evolve around industrial problems which mathematicians may be able to solve in real time Both Industry and Mathematics benefit Industry by increase of mathematical knowledge and ideas brought to bear upon their concerns and Mathematics through the infusion of exciting new problems In the past ten months I have visited numerous industries and national laboratories and met with several hundred scientists to discuss mathematical questions which arise in specific industrial problems Many of the problems have special features which existing mathematical theories do not encompass such problems may open new directions for research However I have encountered a substantial number of problems to which mathematicians should be able to contribute by providing either

rigorous proofs or formal arguments The majority of scientists with whom I met were engineers physicists chemists applied mathematicians and computer scientists I have found them eager to share their problems with the mathematical community Often their only recourse with a problem is to put it on the computer However further insight could be gained by mathematical analysis
