Race, Gender, and the History of Early Analytic Philosophy Matt LaVine, 2020-06-15 Although what we now call analytic philosophy has been around at least since the turn of the twentieth century it wasn't until the latter half of the twentieth century that it became the dominant mode of philosophizing in the Western world In *Race Gender and the History of Early Analytic Philosophy* Matt LaVine argues that the changes associated with this shift from early analytic philosophy a revolutionary movement to later analytic philosophy the hegemon have not been sufficiently recognized While a significant portion of the analytic philosophy of the late 1900s was apolitical and conservative LaVine argues that there is much to gain by thinking of early analytic philosophy in relation to liberatory and emancipatory political aims In particular there is great potential in bringing together inquiry into critical theories of race and gender with inquiry into analytic philosophy LaVine supports this idea by discussing the philosophy of language and logic in relation to the Black Lives Matter movement the objectification of women and more Furthermore LaVine argues there is more precedent for this type of work in the history of early analytic philosophy in particular in the work of G E Moore Susan Stebbing Rudolf Carnap and Ruth Barcan Marcus than is traditionally recognized

The Flight from Reality in the Human Sciences Ian Shapiro, 2009-02-09 In this captivating yet troubling book Ian Shapiro offers a searing indictment of many influential practices in the social sciences and humanities today Perhaps best known for his critique of rational choice theory Shapiro expands his purview here In discipline after discipline he argues scholars have fallen prey to inward looking myopia that results from and perpetuates a flight from reality In the method driven academic culture we inhabit argues Shapiro researchers too often make display and refinement of their techniques the principal scholarly activity The result is that they lose sight of the objects of their study Pet theories and methodological blinders lead unwelcome facts to be ignored sometimes not even perceived The targets of

Shapiro's critique includes the law and economics movement, overzealous formal and statistical modeling, various reductive theories of human behavior, misguided conceptual analysis in political theory, and the Cambridge school of intellectual history. As an alternative to all of these, Shapiro makes a compelling case for problem-driven social research rooted in a realist philosophy of science and an antireductionist view of social explanation. In the lucid if biting prose for which Shapiro is renowned, he explains why this requires greater critical attention to how problems are specified than is usually undertaken. He illustrates what is at stake for the study of power, democracy, law, and ideology, as well as in normative debates over rights, justice, freedom, virtue, and community. Shapiro answers many critics of his views along the way, securing his position as one of the distinctive social and political theorists of our time.

Developing Theories of Intention Philip David Zelazo, Janet Wilde Astington, David R. Olson, 2023-05-31. The chapters collected in this volume represent the state of the art of research on the development of intentional action and intentional understanding, topics that are at the intersection of current research on imitation, early understanding of mental states, goal-directed behavior in nonhuman animals, executive function, language acquisition, and narrative understanding, to name just a few of the relevant foci. Collectively, the contributors demonstrate that intentionality is a key issue in the cognitive and social sciences. Moreover, in a way that was anticipated more than a century ago by the seminal work of J. Mark Baldwin, they are beginning to reveal how the control of action is related in development to children's emerging self-consciousness and their increasingly sophisticated appreciation of other people's perspectives. This volume brings together the world's leading researchers on early social and cognitive development in an in-depth exploration of children's understanding of themselves and others.

Philosophy of Mind William Bechtel, 2013-12-02. Specifically designed to make the philosophy of mind intelligible to those not trained in philosophy, this book provides a concise overview for students and researchers in the cognitive sciences. Emphasizing the relevance of philosophical work to investigations in other cognitive sciences, this unique text examines such issues as the meaning of language, the mind-body problem, the functionalist theories of cognition and intentionality. As he explores the philosophical issues, Bechtel draws connections between philosophical views and theoretical and experimental work in such disciplines as cognitive psychology, artificial intelligence, linguistics, neuroscience, and anthropology.

Mary Warnock Philip Graham, 2021-12-10. This biography illuminates the life and thought of Baroness Mary Warnock, whose active years spanned the second half of the twentieth century, a period during which opportunities for middle-class women rapidly and vastly improved. Warnock was described as probably the most celebrated philosopher in Britain. She began her career as an Oxford University philosophy don and went on to become headmistress of an independent girls' school. Warnock subsequently chaired two select committees, which produced reports of lasting significance, first to children with special needs and second to childless couples. She then became Mistress of Girton College, Cambridge, and an active member of the House of Lords. Alongside these positions, Warnock wrote twenty books ranging from the fields of philosophy to education and medical ethics. Her ideas were largely in tune with

contemporary progressive thinking but late in life Warnock's extreme championing of assisted dying for older people won her enemies even among progressives This authorised biography written by a friend of the subject will be of great value to the general reader with an interest in philosophy ethics twentieth century cultural history and the changing role of women from the 1950s onwards

Chomsky's thought and its revolutionary impact on linguistics psychology philosophy and politics *Analytic Philosophy of Religion* James Franklin Harris, 2013-03-14 When Gene Long editor of Kluwer's Handbook of Contemporary Philosophy of Religion Series first invited me to write the volume on Analytic Philosophy of Religion I accepted with great enthusiasm My only explanation for that enthusiasm now is that I was younger and more naive at the time Soon after starting work on the volume my enthusiasm was dampened by the daunting magnitude of the task I began as a sprinter and quickly settled into the pace of a long distance runner Although I considered myself well read in the subject I soon discovered that I had a great deal of research to do to be confident that I had considered all of the major contributions to the various discussions issues and of religion As I read more and more problems found within analytic philosophy books and articles I realized that I had rushed into a territory already well trodden by the angels I am greatly impressed by the sophistication and subtlety of philosophical argument that characterize the different debates in contemporary analytic philosophy of religion This volume covers a vast amount of material I have endeavored to provide the fairest possible reading of different authors and in cases where I include my own critical evaluations and develop my own positions I have endeavored to provide the strongest possible interpretations of the positions I criticize **The Philosophy of J.
