**Google Plus Marketing** Cori Anderson, 2018-08-24 Google is Google's own social network enabling brands to create relationships with prospects customers and different businesses Similar to different networks you'll be able to share data and pictures promote yourself as a personal and if used properly Google may be a strong social media selling tool The importance

of Google ought to be assessed on a personal basis because it is predicated on your distinctive attractiveness. If it's thought to be of profit to your complete, it ought to be used as a part of your overarching social media strategy. What is Google? Google is Google's flagship social network permitting users to attach simply and sometimes through interests and friendly relationships. It's not an freelance service; instead, it's integrated and connected through all Google services as a part of the ecosystem. Interactions with people or firms are supported profiles or pages. Here may be a helpful example created by Google to share tips and hints on using Google Understanding Google. In several respects, Google is a lot of of an information network than a social network. Facebook was created to attach with friends and socialize, and LinkedIn to attach professionals, whereas Google is to search out others with similar interests. Social networks typically are available 2 forms: asymmetrical and symmetrical. Symmetrical social networks need 2 users to be friends or fans of 1 another before they'll connect. Samples of symmetrical social networks embody Facebook and LinkedIn. An asymmetrical social network permits somebody to follow some other person while not them having to follow back, so as to profit from what that person is posting concerning. Twitter may be a ideal of an asymmetrical social network additionally, as Facebook's fan pages. Google is an asymmetrical social network too, and this provides users the flexibility to grow their network of followers rather more simply as a result of the expansion of the network isn't obsessed on reciprocity. Cristopher S. Penn has pointed out<sup>1</sup> that as a result of reciprocity is elective, individuals appear a lot of willing to attach on networks as a result of they're given the liberty of selection.
