Rybczynski,2013-10-08 An essential toolkit for understanding architecture as both art form and the setting for our everyday lives We spend most of our days and nights in buildings living and working and sometimes playing Buildings often overawe us with their beauty Architecture is both setting for our everyday lives and public art form but it remains mysterious to most of us In *How Architecture Works* Witold Rybczynski one of our best most stylish critics and winner of the Vincent Scully Prize for his architectural writing answers our most fundamental questions about how good and not so good buildings are designed and constructed Introducing the reader to the rich and varied world of modern architecture he takes us behind the scenes revealing how architects as different as Frank Gehry Renzo Piano and Robert A M Stern envision and create their designs He teaches us how to read plans how buildings respond to their settings and how the smallest detail of a stair balustrade for instance can convey an architect s vision Ranging widely from a war memorial in London to an opera house in St Petersburg from the National Museum of African American History and Culture in Washington D C to a famous architect s private retreat in downtown Princeton *How Architecture Works* explains the central elements that make up good building design It is an enlightening humanist s toolkit for thinking about the built environment and seeing it afresh Architecture if it is any good speaks to all of us Rybczynski writes This revelatory book is his grand tour of architecture today [Architects' Gravesites](#)

Henry H. Kuehn,2017-04-28 An illustrated guide to the monumental and non monumental final resting places of famous architects from Aalto Alvar to Frank Lloyd Wright All working architects leave behind a string of monuments to themselves in the form of buildings they have designed But what about the final spaces that architects themselves will occupy Are architects gravesites more monumental more architectural than others This unique book provides an illustrated guide to more than 200 gravesites of famous architects almost all of them in the United States Led by our intrepid author Henry Kuehn we find that most graves of architects are not monumental but rather modest that many architects did not design their final resting places and that a surprising number had their ashes scattered *Architects Gravesites* offers an alphabetical listing from Alvar Aalto and Dankmar Adler Louis Sullivan s partner to Frank Lloyd Wright and Minoru Yamasaki designer of the World Trade Center s twin towers Each entry includes a brief note on the architect s career and a color photograph of the site For example Ludwig Mies van der Rohe is buried in Chicago under a simple granite slab designed by his architect grandson Louise Bethune the first American woman to become a professional architect is buried under a headstone inscribed only with her husband s name a plaque honoring her achievements was installed later Philip Johnson s ashes were spread in his rose garden with no marker across the street from his famous Glass House and the grave of Pierre L Enfant in Arlington National Cemetery offers a breathtaking view of Washington D C the city he designed *Architects Gravesites* is an architectural guide like no other revealing as much about mortality as about monumentality *Encyclopedia of*

Postmodernism Victor E. Taylor, Charles E. Winquist, 2002-06-01 The Encyclopedia of Postmodernism provides comprehensive and authoritative coverage of academic disciplines critical terms and central figures relating to the vast field of postmodern studies With three cross referenced sections the volume is easily accessible to readers with specialized research agendas and general interests in contemporary cultural historical literary and philosophical issues Since its inception in the 1960s postmodernism has emerged as a significant cultural political and intellectual force that many scholars would argue defines our era Postmodernism in its various configurations has consistently challenged concepts of selfhood knowledge formation aesthetics ethics history and politics This Encyclopedia offers a wide range of perspectives on postmodernism that illustrates the plurality of this critical concept that is so much part of our current intellectual debates In this regard the volume does not adhere to a single definition of postmodernism as much as it documents the use of the term across a variety of academic and cultural pursuits The Encyclopedia of Postmodernism it must be noted resists simply presenting postmodernism as a new style among many styles occurring in the post disciplinary academy Documenting the use of the term acknowledges that postmodernism has a much deeper and long lasting effect on academic and cultural life In general the volume rests on the understanding that postmodernism is not so much a style as it is an on going process a process of both disintegration and reformation Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl Avery Library, 1995 *Plans, Sections and Elevations* Richard Weston, 2004 CD ROM contains files for all of the plans sections and elevations included in the book

Architectural Space in Eighteenth-Century Europe Meredith Martin, 2017-07-05 Architectural Space in Eighteenth Century Europe Constructing Identities and Interiors explores how a diverse pan European group of eighteenth century patrons among them bankers bishops bluestockings and courtesans used architectural space and decor to shape and express identity Eighteenth century European architects understood the client's instrumental role in giving form and meaning to architectural space In a treatise published in 1745 the French architect Germain Boffrand determined that a visitor could judge the character of the master for whom the house was built by the way in which it is planned decorated and distributed This interdisciplinary volume addresses two key interests of contemporary historians working in a range of disciplines one the broad question of identity formation most notably as it relates to ideas of gender class and ethnicity and two the role played by different spatial environments in the production not merely the reflection of identity at defining historical and cultural moments By combining contemporary critical analysis with a historically specific approach the book's contributors situate ideas of space and the self within the visual and material remains of interiors in eighteenth century Europe In doing so they offer compelling new insight not only into this historical period but also into our own From Autos to Architecture David Gartman, 2012-04-17 One of the most interesting questions in architectural history is why modern architecture emerged from the war ravaged regions of central Europe and not the United States whose techniques of mass production and mechanical products so inspired the first generation of modern architects like Le Corbusier Mies van der Rohe and Walter

Gropius In *From Autos to Architecture* sociologist David Gartman offers a critical social history that shows how Fordist mass production and industrial architecture in America influenced European designers to an extent previously not understood Drawing on Marxist economics the Frankfurt School and French sociologist Pierre Bourdieu *From Autos to Architecture* deftly illustrates the different class structures and struggles of America and Europe Examining architecture in the context of social conflicts *From Autos to Architecture* offers a critical alternative to standard architectural histories focused on aesthetics alone *Architecture in the Twentieth Century* Peter Gossel, Gabriele Leuthäuser, 2001 After several pages of prologue summing up 18th century highlights especially the rise in importance of geometry some forty pages cover 1784 1916 focusing on the heavily fenestrated high rises of the Chicago School and the iron and glass pavilions of Europe The chapter spanning 1892 1925 concentrates on the many disputes over the trajectory of modernism Nieuwe Kunst Stile Liberty Jugendstil and Art Nouveau all arguing the direction that the boom of prisons hospitals schools town halls and other institutional buildings would take Three more time divisions follow and a concise compendium of architect biographies ends the volume Along with an array of great pictures par for Taschen Gossel and Leuthäuser both active in the private sector add a strong prose style attentive to debates among architects and the socioeconomic stage on which architects act Annotation copyrighted by Book News Inc Portland OR ***Progressive Architecture***, 1984 ***The Design Encyclopedia*** Mel Byars, 1994-08-12 Includes photographs *The Centennial Directory of the American Academy in Rome* American Academy in Rome, 1995 *Princeton* William Barksdale Maynard, 2012 Explores the architectural and cultural history of Princeton University from 1750 to the present Includes 150 historical illustrations Provided by publisher
