Communication Acoustics Ville Pulkki,Matti Karjalainen,2015-01-27 In communication acoustics the communication channel consists of a sound source a channel acoustic and or electric and finally the receiver the human auditory system a complex and intricate system that shapes the way sound is heard Thus when developing techniques in communication acoustics such as in speech audio and aided hearing it is important to understand the time frequency space resolution of hearing This book facilitates the reader s understanding and development of speech and audio techniques based on our knowledge of the auditory perceptual mechanisms by introducing the physical signal processing and psychophysical background to communication acoustics It then provides a detailed explanation of sound technologies where a human listener is involved including audio and speech techniques sound quality measurement hearing aids and audiology Key features Explains perceptually based audio the authors take a detailed but accessible engineering perspective on sound and hearing with a focus on the human place in the audio communications signal chain from psychoacoustics and audiology to optimizing digital signal processing for human listening Presents a wide overview of speech from the human production of speech sounds and basics of phonetics to major speech technologies recognition and synthesis of speech and methods for speech quality evaluation Includes MATLAB examples that serve as an excellent basis for the reader s own investigations into communication acoustics interaction schemes which intuitively combine touch vision and voice for lifelike interactions

Immersive Audio Signal Processing Sunil Bharitkar,Chris Kyriakakis,2008-10-04 This graduate level text lays out the

foundation of DSP for audio and the fundamentals of auditory perception then goes on to discuss immersive audio rendering and synthesis the digital equalization of room acoustics and various DSP implementations It covers a variety of topics and up to date results in immersive audio processing research immersive audio synthesis and rendering multichannel room equalization audio selective signal cancellation multirate signal processing for audio applications surround sound processing psychoacoustics and its incorporation in audio signal processing algorithms for solving various problems and DSP implementations of audio processing algorithms on semiconductor devices Acoustics, Speech and Signal Processing IEEE Signal Processing Society, Institute of Electrical and Electronics Engineers, 1994
