History And Freedom Lectures 1964 1965:

History and Freedom Theodor W. Adorno, 2014-11-05 Despite all of humanity's failures, futile efforts and wrong turnings in the past, Adorno did not let himself be persuaded that we are doomed to suffer a bleak future forever. One of the factors that prevented him from identifying a definitive plan for the future course of history was his feelings of solidarity with the victims and losers. As for the future, the course of events was to remain open-ended instead of finality; he remained committed to a Heidegger-like openness. This trace of the messianic has what he called the colour of the concrete as opposed to mere abstract possibility. Early in the 1960s, Adorno gave four courses of lectures on the road leading to *Negative Dialectics*, his magnum opus of 1966. The second of these was concerned with the topics of history and freedom. In terms of content, these lectures represented an early version of the chapters in *Negative Dialectics* devoted to Kant and Hegel. In formal terms, these were improvised lectures that permit us to glimpse a philosophical work in progress. The text published here gives us an overview of all the themes and motifs of Adorno's philosophy of history: the key notion of the domination of nature; his criticism of the existentialist concept of a historicity without history; and finally his opposition to the traditional idea of truth as something permanent, unchanging, and ahistorical.

Nietzsche and Sociology Anas Karzai, 2019-04-18 Nietzsche and Sociology: Prophet of Affirmation is about Friedrich Nietzsche's sociological reading of modern industrial society. Nietzsche is often identified as a philosopher, but his uniquely sociological theories and ideas have been disregarded and unacknowledged in the social sciences. This work examines the reasons why Nietzsche has been ignored in sociological literature despite the evidence that most classical and modern sociological thinkers have been profoundly influenced by him. This book argues that the discipline of sociology would benefit by seriously considering the sociological elements in Nietzsche's prolific work as a way of reevaluating not only the tradition of sociology but also the sociology of tradition. His major contributions on rethinking traditional sociological theories and concepts in terms of their moral origins make it impossible for the social sciences to continue overlooking Nietzsche as a critical sociological thinker. His conception of non-economic power has become progressively more salient. Given the current juncture of humanity on the brink, Nietzsche's affirmative philosophy of life is a breath of fresh air. He remains an intellectual force to be reckoned with and may just be the remedy to our present civilizational malaise.

Why History? Donald Bloxham, 2020-07-09 What is the point of history? Why has the study of the past been so important for so long? *Why History?* A History contemplates two and a half thousand years of historianship to establish how very different thinkers in diverse contexts have conceived their activities and to illustrate the purposes that their historical investigations have served. Whether considering Herodotus, medieval religious exegesis, or twentieth-century cultural history, at the core of this work is the way that the present has been conceived to relate to the past. Alongside many changes in technique and philosophy, Donald Bloxham's book reveals striking long-term continuities in justifications for the discipline.

Islam, Orientalism and Intellectual History Mohammad R. Salama, 2011-03-30 Debates on the relationship

between Islam and the West rage on from talk of clashing civilizations to political pacification from ethical and historical perspectives to distrust xenophobia and fear Here Mohammad Salama argues that the events of 9 11 force us to engage ourselves fully without preconditions in understanding not just the history of Islam as a religion but of Islam as a historical condition that has existed in relationship to the West since the seventh century Salama compares the Arab Islamic and European traditions of historical thought since the early modern period focusing on the watershed moments that informed the two traditions ideas of intellectual history and perceptions of one another He draws attention to European intellectual history s entangled links with the Islamic philosophy of history especially the complexities of orientalism and modernity Recent critical reflections on the work of Ibn Khald n confirm this intertwined and troubled relationship reflecting major disparities and contradictions At the same time recent Arab writings on Europe s intellectual history reveal a struggle against erasure and intellectual superiority Calling for a new understanding of the relationship between Islam and the West Salama argues that Islam has played a major role in enabling and positioning various paths of Western historiography at crucial moments of its development leaving palpable imprints on Islamic historiography in the process He proposes an answer to a fundamental question how to make sense of the mechanics of production in Arab Islamic and Western historiographies or how to identify the ways in which they have both failed to make sense of themselves and of each other in an increasingly disenchanted postnationalist world Spanning an impressive array of recent writings on these themes as well as older foundational texts in both traditions including al Tabar Ibn Khald n Hegel al Jabart Toynbee Foucault Edward Said and Hourani this book is both timely and crucial for all those interested in Islamic and Middle Eastern studies Western and Islamic philosophies of history modernity and the relationship between Islam and the West

A Cultural History of Tragedy in the Modern Age Jennifer Wallace, 2021-05-20 In this book leading scholars come together to provide a comprehensive wide ranging overview of tragedy in theatre and other media from 1920 to the present The 20th century is often considered to have witnessed the death of tragedy as a theatrical genre but it was marked by many tragic events and historical catastrophes from two world wars and genocide to the proliferation of nuclear weapons and the anticipation and onset of climate change The authors in this volume wrestle with this paradox and consider the degree to which the definitions forms and media of tragedy were transformed in the modern period and how far the tragic tradition updated in performance still spoke to 20th and 21st century challenges While theater remains the primary focus of investigation in this strikingly illustrated book the essays also cover tragic representation often re mediated fragmented and provocatively questioned in film art and installation photography fiction and creative non fiction documentary reporting political theory and activism Since 24 7 news cycles travel fast and modern crises cross borders and are reported across the globe more swiftly than in previous centuries this volume includes intercultural encounters various forms of hybridity and postcolonial tragic representations Each chapter takes a different theme as its focus forms and media sites of performance and circulation

communities of production and consumption philosophy and social theory religion ritual and myth politics of city and nation society and family and gender and sexuality *Adorno and Marx* Werner Bonefeld, Chris O'Kane, 2022-06-02 While Adorno has tended to be read as a critic of the administered world and the consumer industry rather than a Marxist Adorno and Marx establishes Adorno's negative dialectics as fundamental for understanding Marx's critique of political economy This conception of the critique of political economy as a critical theory marks both a radical departure from traditional Marxist scholarship and from traditional readings of Adorno's work and warns against identifying Adorno with Marx or Marx with Adorno Rather it highlights the intersection between Adorno's critical theory and Marx's critique of political economy that produces a critical theory of economic objectivity that moves beyond Marxian economics and Adornian social theory Adorno and Marx offers an ingenious account of critical social theory Its subversion of the economic categories of political economy contributes to the cutting edge of contemporary social theory and its critique of social practice *Does History Make Sense?* Terry Pinkard, 2017-02-27 Cover Title Page Copyright Dedication Contents Introduction 1 Preliminaries The Logic of Self Conscious Animals 2 Building an Idealist Conception of History 3 Hegel's False Start Non Europeans as Failed Europeans 4 Europe's Logic 5 Infinite Ends at Work in History Notes Bibliography Acknowledgments Index Arts of Connection Karen S. Adorno and Michel Foucault Although Adorno was situated squarely in the Marxist tradition that Foucault would occasionally challenge Cook demonstrates that their critiques of our current predicament are complementary in important respects Among other things they converge in their focus on the historical conditions economic in Adorno and political in Foucault that gave rise to the racist and authoritarian tendencies that continue to blight the West But this book will also show that as Adorno and Foucault plumb the economic and political forces that have shaped our identities they offer remarkably similar answers to the perennial question What is to be done *Adorno on Nature* Deborah

Cook,2014-09-11 Decades before the environmental movement emerged in the 1960s Adorno condemned our destructive and self destructive relationship to the natural world warning of the catastrophe that may result if we continue to treat nature as an object that exists exclusively for our own benefit Adorno on Nature presents the first detailed examination of the pivotal role of the idea of natural history in Adorno s work A comparison of Adorno s concerns with those of key ecological theorists social ecologist Murray Bookchin ecofeminist Carolyn Merchant and deep ecologist Arne Naess reveals how Adorno speaks directly to many of today s most pressing environmental issues Ending with a discussion of the philosophical conundrum of unity in diversity Adorno on Nature also explores how social solidarity can be promoted as a necessary means of confronting environmental problems From Sight through to In-Sight Omar Sabbagh,2014-01-05 An interdisciplinary study of the Impressionist early Modernist works of Conrad and Ford this book aims to show how the represented temporalities whether to do with past present future experience within and without the novels or logical structural relations of before and after are at the core of the won effects of both authors oeuvres Looking at such well known works as Nostromo The Good Soldier The Fifth Queen Parade s End the study makes use of philosophy historical and contemporary theology psychoanalysis and other sources to re describe unlock and display the fertile ways in which time and historical experience are both manumitted within the tales analysed and recursively within their reading experience Ultimately the two senses of making you see from Conrad s iconic Preface are used as gambits to understand the ways in which these novels are metaphysically vibrant symbolically hopeful as against the more common interpretation of metaphysical dissolution and over determined failure

A Dialectical Journey through Fashion and Philosophy Eun Jung

Kang,2020-01-01 This book takes an in depth look at the integration of fashion and philosophy It challenges the deeply rooted prejudice or misconception that fashion is a field limited to body oriented and appearance related themes and practices It also reveals that fashion is intermeshed with distinctively modern issues that belong to the realm of the mind as well as the body In doing so it refashions philosophy and philosophizes fashion which ultimately amount to the same thing The book argues that while the philosophization of fashion can give a clearer understanding of some esoteric areas of philosophy and fashion s close connection to modern societies and politics it also shows that philosophy can assist in redeeming fashion from the objective bodily world positioning it as an indispensable part of the humanities This is because fashion manifests critical aspects of human culture in our time and is an expression of the zeitgeist which is interwoven with the unfolding of history This book will be highly relevant to students and researchers in fashion studies who are looking for the theoretical underpinnings and insights for their own work It will also be of keen interest to scholars in the field of philosophy who are seeking to apply philosophical concepts to both everyday life and our empirical world

Making the Familiar Strange

Ryan Gunderson,2020-11-29 This book examines the meaning and implications of the sociological maxim make the familiar strange Addressing the methodological questions of why and how sociologists should make the familiar strange what it means to make the familiar strange and how this approach benefits sociological research and theory it draws on four central concepts reification familiarity strangeness and defamiliarization Through a typology of the notoriously ambiguous concept of reification the author argues that the primary barrier to sociological knowledge is our experience of the social world as fixed and unchangeable Thus emerges the importance of constituting the familiar as the strange through a process of social defamiliarization as well as making this process more methodical by reflecting on heuristics and patterns of thinking that render society strange The first concerted effort to examine an important feature of the sociological imagination this volume will appeal to sociologists of any specialty and theoretical persuasion

Disorienting Neoliberalism Benjamin L.

McKean,2020-09-23 In the world neoliberalism has made the pervasiveness of injustice and the scale of inequality can be so overwhelming that meaningful resistance seems impossible Disorienting Neoliberalism argues that combatting the injustices of today s global economy begins with reorienting our way of seeing so that we can act more effectively Within political theory standard approaches to global justice envision ideal institutions but provide little guidance for people responding to today s most urgent problems Meanwhile empirical and historical research explains how neoliberalism achieved political and intellectual hegemony but not how we can imagine its replacement Disorienting Neoliberalism argues that people can and

should become disposed to solidarity with each other once they see global injustices as a limit on their own freedom Benjamin L McKean reorients us by taking us inside the global supply chains that assemble clothes electronics and other goods revealing the tension between neoliberal theories of freedom and the hierarchical coercive reality of their operations In this new approach to global justice he explains how neoliberal institutions and ideas constrain the freedom of people throughout the supply chain from worker to consumer Rather than a linked set of private market exchanges supply chains are political entities that seek to govern the rest of us Where neoliberal institutions train us to see each other as competitors McKean provides a new orientation to the global economy in which we can see each other as partners in resisting a shared obstacle to freedom and thus be called to collective action Drawing from a wide range of thinkers from Hegel and John Rawls to W E B Du Bois and Iris Marion Young Disorienting Neoliberalism shows how political action today can be meaningful and promote justice moving beyond the pity and resentment global inequality often provokes to a new politics of solidarity
