Gascó, 2012. *Digitalization and Public Sector Transformations* Jannick Schou, Morten Hjelholt, 2018-04-13. This book provides a study of governmental digitalization, an increasingly important area of policymaking within advanced capitalist states. It dives into a case study of digitalization efforts in Denmark, fusing a national policy study with local institutional analysis. Denmark is often framed as an international forerunner in terms of digitalizing its public sector and thus provides a particularly instructive setting for understanding this new political instrument. Advancing a cultural political economic approach, Schou and Hjelholt argue that digitalization is far from a quick technological fix. Instead, this area must be located against wider transformations within the political economy of capitalist states. Doing so, the book excavates the political roots of digitalization and reveals its institutional consequences. It shows how new relations are being formed between the state and its citizens. *Digitalization and Public Sector Transformations* pushes for a renewed approach to governmental digitalization and will be of interest to scholars working in the intersections of critical political economy, state theory and policy studies. **Digital Transformation in Sustainable Value Chains and Innovative Infrastructures** Galimkair

Mutanov, Askhat Serikbekuly, 2022-10-05. This book includes 15 works by scientists of the Eurasian region which reveal the various stages of the life cycle of digital transformation. The creation of value propositions and their distribution chains is important for the sustainable development of society. This view of sustainable value chains on the part of public administration and business, considering modern scientific research, reveals the problems of education and science in the formation of chains, sustainability and their infrastructure. Modern views on the actual problems of the digital service in the creation of value propositions with the participation of development institutions, new educational technologies and state regulation both at the level of the world community and at the level of individual countries are revealed.
