Fragments of Home Tom Scott-Smith, 2024-09-03 Abandoned airports Shipping containers Squatted hotels These are just three of the many unusual places that have housed refugees in the past decade The story of international migration is often told through personal odysseys and dangerous journeys but when people arrive at their destinations a more mundane task begins refugees need a place to stay Governments and charities have adopted a range of strategies in response to this need Some have sequestered refugees in massive camps of glinting metal Others have hosted them in renovated office blocks and disused warehouses They often end up in prefabricated shelters flown in from abroad This book focuses on seven examples of emergency shelter from Germany to Jordan which emerged after the great summer of migration in 2015 Drawing on detailed ethnographic research into these shelters the book reflects on their political implications and opens up much bigger questions about humanitarian action By exploring how aid agencies and architects approached this basic human need Tom Scott Smith demonstrates how shelter has many elements that are hard to reconcile or combine shelter is always partial and incomplete producing mere fragments of home Ultimately he argues that current approaches to emergency shelter have led to destructive forms of paternalism and concludes that the principle of autonomy can offer a more fruitful approach to sensitive and inclusive housing

Justice Reform and Development Linn A. Hamnergren, 2014-04-29 This book explores the objectives pursued in donor programs the methods used to advance them and the underlying assumptions and strategies It emphasizes the unexpected and sometimes unpleasant consequences of

ignoring not only political and societal constraints but also advances in our technical approaches to performance improvement the one area where the First World has a comparative advantage The geographic scope of the work is broad incorporating examples from Eastern and Central Europe Latin America Africa and the Asia Pacific region as well as from several First World nations Justice Reform and Development examines First World assistance to justice or rule of law reforms in developing and transitional societies arguing that its purported failure is vastly exaggerated largely because of unrealistic expectations as to what could be accomplished Change nonetheless is needed if the programs are to continue and would be best based on targeting specific performance problems incorporation of donor countries experience with their own reforms and greater attention to relevant research While contributing to an on going debate among practitioners and academics involved in justice programs this book will also be accessible to readers with little exposure to the topics especially advanced undergraduate and graduate students in law political science and areas studies
