Historical Analogs For The Stimulation Of Space Commerce:

Historical Analogs for the Stimulation of Space Commerce Roger D. Launius, 2015-03-13 With the rise of a range of private sector entrepreneurial firms interested in pursuing space commerce the process whereby their efforts might be incubated fostered and expanded comes to the fore as an important public policy concern in a way never before present in the Space Age In the United States we are witnessing the convergence of several powerful economic forces including the need to restore American capability to reach low Earth orbit LEO for the servicing of the International Space Station ISS and the rise of a hospitality tourism entertainment industry interested in space Through these case studies we explore how to apply more effectively already tested models of government support for commercial activities as well as the interactions of both the public and private spheres in a new opportunity zone in space In each case a summation yields a range of key points

Historical Analogs for the Stimulation of Space Commerce National Aeronautics Administration, Roger Launius, 2014-09-07 This study investigates and analyzes historical episodes in America in which the federal government undertook public private efforts to complete critical activities valued for their public good This combination largely resulted from a lack of either sufficient political will to fund them entirely out of the public treasury or insufficient profit motive for private firms to undertake them for purely business reasons The six case studies include the following 1 the development of the transcontinental railroad supported by a unique land grant approach to subsidy 2 support for the airline industry through legislation appropriate regulation and subsidies to grow a robust air transport capability 3 the regulatory regime put into place with the rise of the telephone industry and the creation of a government sponsored monopoly that eventually had to be broken up 4 government sponsorship of Antarctic scientific stations that evolved into a public private partnership PPP over time 5 the fostering of a range of public works projects and their success or failure over time and 6 the establishment of scenic and cultural conservation zones in the United States and ways to balance economic development with preservation

Historical Studies in the Societal Impact of Spaceflight Steven J. Dick, 2015 **The Rise of the Commercial Space Industry** Brian C. Odom, 2024-09-13 This collection explores the evolution of the commercial space industry from the beginning of the space age through the early twenty first century Today the space industry is taking on an increased leadership and innovation role in both space access and exploration The growth of commercial space over the past decades offers a potential new paradigm for space exploration one in which industry transitions from supplier to partner However many questions remain This book seeks to bring to light these questions which span from the most seemingly consequential how will humanity explore the Moon and Mars to the most basic what is commercial space To further develop the historical context of commercial space and thereby better inform decision making at NASA in the future this volume examines a broad range of questions related to the history of commercial space operations including but not limited to how has the concept of commercial space evolved in different fields and disciplines What have been the major events and milestones in the

emergence and evolution of commercial space activities in the USA and internationally How has the US Government assisted or impeded the emergence and evolution of commercial space activities Providing contributions from a range of different disciplines and backgrounds the authors of this volume offer valuable insights for scholars researching the history of space and space policy as well as decision makers working at NASA or within the wider space industry *Space Warfare in the 21st Century* Joan Johnson-Freese,2016-11-08 This book examines the recent shift in US space policy and the forces that continually draw the US back into a space technology security dilemma The dual use nature of the vast majority of space technology meaning of value to both civilian and military communities and being unable to differentiate offensive from defensive intent of military hardware makes space an area particularly ripe for a security dilemma In contrast to previous administrations the Obama Administration has pursued a less militaristic space policy instead employing a strategic restraint approach that stressed multilateral diplomacy to space challenges The latter required international solutions and the United States subsequently even voiced support for an International Code of Conduct for Space That policy held until the Chinese anti satellite ASAT test in 2013 which demonstrated expanded Chinese capabilities This volume explores the issues arising from evolving space capabilities across the world and the security challenges this poses It subsequently discusses the complexity of the space environment and argues that all tools of national power must be used with some degree of balance toward addressing space challenges and achieving space goals This book will be of much interest to students of space policy defence studies foreign policy security studies and IR NASA and the Long Civil Rights Movement Brian C. Odom,Stephen P. Waring,2022-04-12 Examining the ways in which NASA's goal of space exploration both conflicted and aligned with the cause of racial equality this volume provides new insights into the complex relationship between the space program and the civil rights movement in the Jim Crow South and abroad **Financing the New Space Industry** Howard E. McCurdy,2019-11-09 This Palgrave Pivot investigates the efforts of five aerospace companies SpaceX Blue Origin Virgin Galactic Orbital Sciences and the Boeing Company to launch their entry into the field of commercial space transportation Can private sector firms raise enough capital to end the usual dependence on government funding What can historical examples of other large scale transportation initiatives such as the first transcontinental railway and the first commercial jetliner teach us about the prospects of commercial space flight As Howard E McCurdy shows commercializing space is a great experiment the outcome of which will depend on whether new space entrepreneurs can attract support from a variety of traditional and nontraditional sources The Twenty-First Century Commercial Space Imperative Anthony Young,2015-06-01 Young addresses the impressive expansion across existing and developing commercial space business markets with multiple private companies competing in the payload launch services sector The author pinpoints the new markets technologies and players in the industry as well as highlighting the overall reasons why it is important for us to develop space NASA now relies on commercial partners to supply cargo and crew spacecraft and services to and from the

International Space Station The sizes of satellites are diminishing and their capabilities expanding while costs to orbit are decreasing Suborbital space tourism holds the potential of new industries and jobs Commercial space exploration of the Moon and the planets also holds promise All this activity is a catalyst for anyone interested in joining the developing space industry from students and researchers to engineers and entrepreneurs As more and more satellites and rockets are launched and the business of space is expanding at a significant pace it is increasingly important for scientists and engineers of many disciplines to understand how the business evolved and where it is continuing to develop The growing field is fully explored in this concise overview to the players in this changing landscape *Astrobiology, Discovery, and Societal Impact*

Steven J. Dick, 2018-05-03 Examines humanistic aspects of astrobiology exploring approaches critical issues and implications of the discovery of extraterrestrial life

Life in Space Maura Phillips Mackowski, 2022-05-24 This book explores the many aspects and outcomes of NASA's research in life sciences a little understood endeavor that has often been overlooked in histories of the space agency [Ice and Snow in the Cold War](#) Julia Herzberg, Christian Kehrt, Franziska Torma, 2018-10-19 The history of the Cold War has focused overwhelmingly on statecraft and military power an approach that has naturally placed Moscow and Washington center stage Meanwhile regions such as Alaska the polar landscapes and the cold areas of the Soviet periphery have received little attention However such environments were of no small importance during the Cold War in addition to their symbolic significance they also had direct implications for everything from military strategy to natural resource management Through histories of these extremely cold environments this volume makes a novel intervention in Cold War historiography one whose global and transnational approach undermines the simple opposition of East and West

50 Years of Solar System Exploration Linda Billings, 2021 To commemorate the 50th anniversary of the first successful planetary mission Mariner 2 sent to Venus in 1962 the NASA History Program Office the Division of Space History at the National Air and Space Museum NASA's Science Mission Directorate and the Jet Propulsion Laboratory organized a symposium Solar System Exploration 50 was held in Washington D C on 25-26 October 2012 The purpose of this symposium was to consider over the more than 50 year history of the Space Age what we have learned about the other bodies of the solar system and the processes by which we have learned it Symposium organizers asked authors to address broad topics relating to the history of solar system exploration such as various flight projects the development of space science disciplines the relationship between robotic exploration and human spaceflight the development of instruments and methodologies for scientific exploration as well as the development of theories about planetary science solar system origins and implications for other worlds The papers in this volume provide a richly textured picture of important developments and some colorful characters in a half century of solar

system exploration A comprehensive history of the first 50 years of solar system exploration would fill many volumes What readers will find in this volume is a collection of interesting stories about money politics human resources commitment competition and cooperation and the faster better cheaper era of solar system exploration Origins of 21st-century Space Travel Glen R. Asner, Stephen J. Garber, 2019 As early as April 1999 NASA Administrator Dan Goldin established the Decadal Planning Team DPT to provide a forum for future Agency leaders to begin considering goals more ambitious than sending humans on missions to near Earth destinations and robotic spacecraft to far off destinations with no relation between the two Goldin charged DPT with devising a long term strategy that would integrate the entire range of the Agency's capabilities in science and engineering robotic and human spaceflight to reach destinations beyond low Earth orbit When the Bush administration initiated interagency discussions in 2003 to consider a new spaceflight strategy NASA was prepared with technical and policy options as well as a team of individuals who had spent years preparing for the moment Although elements of the policy that President Bush announced at NASA Headquarters in January 2004 the Vision for Space Exploration VSE differed from the plans developed by DPT and its successor the NASA Exploration Team NeXT the benefits of preparation were unmistakable From the moment President Bush announced the VSE NASA stood ready to implement it Key decisions such as setting a termination date for Shuttle flights and initiating development of technologies for deep space exploration heralded a paradigm shift allowing both NASA and the U S space community to move beyond the infrastructure technologies and institutional arrangements that had sustained low Earth orbit operations for more than two decades This book provides a detailed historical account of the plans debates and decisions that opened the way for a new generation of spaceflight at the start of the 21st Century *Beyond Earth* Asif A. Siddiqi, 2018 This is a completely updated and revised version of a monograph published in 2002 by the NASA History Office under the original title Deep Space Chronicle A Chronology of Deep Space and Planetary Probes 1958 2000 This new edition not only adds all events in robotic deep space exploration after 2000 and up to the end of 2016 but it also completely corrects and updates all accounts of missions from 1958 to 2000 Provided by publisher Science Advice to NASA Joseph K. Alexander, 2017 This book documents highlights of NASA's interactions with outside scientific advisors over the agency's full lifetime and draws lessons from that history for research managers decision makers and scientists The book is divided into three parts the first two being focused on history and the third on synthesis and analysis Part 1 briefly examines early forerunner activities at NACA and in the decade leading up to NASA's formation and it then considers NASA's use of outside advice during its first three decades Part 2 picks up the story in 1988 and follows it up to 2016 Part 3 examines a sampling of case studies discusses recurring characteristics of notably successful advisory activities and provides a glimpse at what past experience might imply for the future of scientific advice at NASA The last two chapters provide big picture summaries of themes that have emerged from earlier discussions
