

# HISTORICAL CONCEPTS UNIT

## Understanding Historical Concepts

### 1 - Government

The reasons why humans created governments and what roles they commonly performed.

### 5 - Economics

How societies and individuals have attempted to manage and use their resources.

### 2 - Nations & Nationality

What factors turn small communities into nations and how nations expand.

### 6 - Geography

How geographical factors have impacted human life and evolution.

### 3 - Religion

Why humans developed spiritual beliefs and how these influenced their governments and societies.

### 7 - Historical Sources

How documents from the past can help us to understand events from different perspectives.

### 4 - Societies

How large groups of humans have organized themselves into smaller divisions and classes.

### 8 - Cause & Effect

Learning how events can have multiple causes and how to analyze their importance.

In my many years of teaching history I've often found that the biggest problem students have is that they have little or no knowledge about basic concepts as simple as what governments do, what economics is, and how societies are organized among other things.

This unit is designed to give students a basic schema into which they can place and arrange the information and ideas they learn throughout their study of ancient and world history.

Students will also be introduced to how to use and evaluate historical sources as well as employ basic graphic organizers to help arrange and analyze information.
