Ruth Watts,2013-05-13 The first book of its kind to provide a full and comprehensive historical grounding of the contemporary issues of gender and women in science *Women in Science* includes a detailed survey of the history behind the popular subject and engages the reader with a theoretical and informed understanding with significant issues like science and race gender and technology and masculinity It moves beyond the historical work on women and science by avoiding focusing on individual women scientists **The Palgrave Handbook of Women and Science since 1660** Claire G. Jones,Alison E. Martin,Alexis Wolf,2021-12-02 This handbook provides a comprehensive overview of core areas of investigation and theory relating to the history of women and science Bringing together new research with syntheses of pivotal scholarship the volume acknowledges and integrates history theory and practice across a range of disciplines and periods While the handbook s primary focus is on women s experiences chapters also reflect more broadly on gender including issues of femininity and masculinity as related to scientific practice and representation Spanning the period from the birth of modern science in the late seventeenth century to current challenges facing women in STEM it takes a thematic and comparative approach to unpack the central issues relating to women in science across different regions and cultures Topics covered include scientific networks institutions and archives cultures of science science communication and access and diversity With its breadth of coverage this handbook will be the go to resource for undergraduates taking courses on the history and philosophy of science and gender history while at the same time providing the foundation for more advanced scholars to undertake further historical and theoretical investigation **Colonization, Revolution, and the New Republic: Beginnings to 1860** Elizabeth Purdy,2020-02-01 Written in engaging and accessible prose by experts in the field this reference introduces readers to the hidden history of women in America from its beginnings to 1860 bringing their achievements to light and helping them gain the recognition they deserve Chapters include Arts and Literature Business Education Entertainment Family Health Politics Science and Medicine Society **The Madame Curie Complex** Julie Des Jardins,2010-03-01 The historian and author of *Lillian Gilbreth* examines the Great Man myth of science with profiles of women scientists from Marie Curie to Jane Goodall Why is science still considered to be predominantly male profession In *The Madame Curie Complex* Julie Des Jardin dismantles the myth of the lone male genius reframing the history of science with revelations about women s substantial contributions to the field She explores the lives of some of the most famous female scientists including Jane Goodall the eminent primatologist Rosalind Franklin the chemist whose work anticipated the discovery of DNA s structure Rosalyn Yalow the Nobel Prize winning physicist and of course Marie Curie the Nobel Prize winning pioneer whose towering mythical status has both empowered and stigmatized future generations of women considering a life in science With lively anecdotes and vivid detail *The Madame Curie Complex* reveals how women scientists have changed the course of science and the role of the scientist throughout the twentieth century They often asked different questions used different methods and came up with different groundbreaking explanations for phenomena in the natural

world **Good Observers of Nature** Tina Gianquitto, 2010-01-25 In *Good Observers of Nature* Tina Gianquitto examines nineteenth century American women's intellectual and aesthetic experiences of nature and investigates the linguistic perceptual and scientific systems that were available to women to describe those experiences. Many women writers of this period used the natural world as a platform for discussing issues of domesticity, education and the nation. To what extent, asks Gianquitto, did these writers challenge the prevalent sentimental narrative modes like those used in the popular flower language books and use scientific terminology to describe the world around them? The book maps the intersections of the main historical and narrative trajectories that inform the answer to this question: the changing literary representations of the natural world in texts produced by women from the 1820s to the 1880s and the developments in science from the Enlightenment to the advent of evolutionary biology. Though Gianquitto considers a range of women's nature writing: botanical manuals, plant catalogs, travel narratives, seasonal journals, scientific essays, she focuses on four writers and their most influential works: Almira Phelps' *Familiar Lectures on Botany* (1829), Margaret Fuller's *Summer on the Lakes* (1843), Susan Fenimore Cooper's *Rural Hours* (1850) and Mary Treat's *Home Studies in Nature* (1885). From these writings emerges a set of common concerns about the interaction of reason and emotion in the study of nature, the best vocabularies for representing objects in nature, local scientific or moral and the competing systems for ordering the natural world: theological, taxonomic or aesthetic. This is an illuminating study about the culturally assumed relationship between women, morality and science.

The Establishment of Science in America Sally Gregory Kohlstedt, Michael Mark Sokal, Bruce V. Lewenstein, 1999 A history of the American Association for the Advancement of Science providing insight into the development of science in the USA in the last 150 years. Negotiating Boundaries? Identities, Sexualities, Diversities Clare Beckett, Marie Macey, Owen Heathcote, 2009-05-05 *Negotiating Boundaries: Identities, Sexualities, Diversities* is a collection of essays by contributors from and/or on societies across the world: Bosnia Herzegovina, Croatia, France, Iran, The Netherlands, New Zealand, Poland, South and West Africa, the UK and the USA. They are from a range of academic disciplines: English Literature, Islamic and Middle Eastern Studies, Literary and Cultural Studies, Modern Languages, Religious Studies, Social Anthropology, Social Policy, Sociology and Theology. This level of diversity has resulted in the most wide-ranging volume ever published in the social sciences and humanities around the concept of Boundaries. The book is at the cutting edge of intellectual thinking on personal and social boundaries applied to such areas as Art, Genocide, Rape, Identities, God, Godde, Lesbianism, Literature, Men in Women's Professions, Muslim women in Muslim and non-Muslim countries, Nationalism and Symbolism, Poetry, Religion, Sexual Harassment, Sexuality, Women in Science, Transgenderism, Virginity Testing and War. This range of contributors, locations and topics could have resulted in an incoherent volume with appeal to only a somewhat esoteric readership. However, the skilful use of the concept of Boundaries not only gives this book structured coherence but makes it

important reading for a wide range of academics theorists and researchers in a diversity of disciplines This is a lively engaged nuanced portrayal of the struggles around identity inequality and domination Ambitious in its scope international interdisciplinary and multi dimensional in its social focus Identities Sexualities Diversities offers a powerful picture of struggle and the pursuit of change through the conceptual lens of boundaries This collection explores the diverse ways boundaries operate bringing new insights and questions to an established debate It also importantly explores how boundaries can provide bridges Thus through its interweaving of theory and empirical analysis and through its stories of bodies texts work sexual expression self presentation and changing values Identities Sexualities Diversities offers a text that is reflexive analytically thoughtful and significantly hopeful Davina Cooper Professor of Law and Political Theory Director of AHRC Research Centre for Law Gender and Sexuality Kent Law School University of Kent This is a fascinating collection of papers that provides new and important insights into the variety and natures of boundaries around ethnicity identity and sexuality Using the complex concept of boundaries the writers explore identities sexualities and diversities through boundary crossings contested boundaries oppressive boundaries and creative resistant boundaries This provides a wonderful coherent engagement with some of the key struggles at the present time over contested territory at personal and global levels The range of articles ensures that these debates are contextualised in particular societies and cultures providing a rich source of theoretical material that helps our understandings of these complex and crucial issues The theoretical rigour and fascinating insights presented in this edited book deserves a wide readership from those involved in the social sciences women s studies the humanities and all those interested in transgressing conventional boundaries of scholarship Sheila Scraton Pro Vice Chancellor Director of University Research Professor of Leisure and Feminist Studies Leeds Metropolitan University

Science, Technologies and Material Culture in the History of Education Heather Ellis,2020-05-18 Developed out of a 2015 conference of the History of Education Society UK this book explores the interconnections between the histories of science technologies and material culture and the history of education The

contributions express a shared concern over the extent to which the history of science and technology and the history of education are too frequently written about separately from each other despite being intimately connected. This state of affairs they suggest is linked to broader divisions in the history of knowledge which has for many years been carved up into sections reflective of the academic subject divisions that structure modern universities and higher education in the West. Most noticeably this has occurred with the history of science but more recently the history of humanities has been divided as well. The contributions to this volume demonstrate the diversity and originality of research currently being conducted into the connections between the history of science and the history of education. The importance of objects in teaching and their value as pedagogical tools emerges as a particularly significant area of research located at the intersection between the two fields of enquiry. Indeed it is the materiality of education a focus on the use of objects pedagogical practices and particular spaces which seems to offer some of the most promising avenues for exploring further the relationship between the histories of science and education. This book was originally published as a special issue of the *History of Education*. Debating Contemporary Approaches to the History of Science Lukas M. Verburgt, 2024-01-11. *Debating Contemporary Approaches to the History of Science* explores the main themes problems and challenges currently at the top of the discipline's methodological agenda. In its chapters established and emerging scholars introduce and discuss new approaches to the history of science and revisit older perspectives which remain crucial. Each chapter is followed by a critical commentary from another scholar in the field and the author's response. The volume looks at such topics as the importance of the global digital environmental and posthumanist turns for the history of science and the possibilities for the field of moving beyond a focus on ideas and texts towards active engagement with materials and practices. It also addresses important issues about the relationship between history of science on the one hand and philosophy of science history of knowledge and ignorance studies on the other. With its innovative format this volume provides an up to date authoritative overview of the field and also explores how and why the history of science is practiced. It is essential reading for students and scholars eager to keep a finger on the pulse of what is happening in the history of science today and to contribute to where it might go next.

History, Memory and Public Life Anna Maerker, Simon Sleight, Adam Sutcliffe, 2018-07-06. *History Memory and Public Life* introduces readers to key themes in the study of historical memory and its significance by considering the role of historical expertise and understanding in contemporary public reflection on the past. Divided into two parts the book addresses both the theoretical and applied aspects of historical memory studies. Approaches to history and memory introduces key methodological and theoretical issues within the field such as postcolonialism sites of memory myths of national origins and questions raised by memorialisation and museum presentation. Difficult pasts looks at history and memory in practice through a range of case studies on contested complex or traumatic memories including the Northern Ireland Troubles post apartheid South Africa and the Holocaust. Examining the intersection between history and memory

from a wide range of perspectives and supported by guidance on further reading and online resources this book is ideal for students of history as well as those working within the broad interdisciplinary field of memory studies
