## Essential Understanding

The Industrial Revolution began in England, spreading to the rest of Western Europe and the United States. With the Industrial Revolution, came an increased demand for raw materials from the Americas, Asia, and Africa. Advancements in technology produced the Industrial Revolution, while advancements in science and medicine altered the lives of people living in the new industrial cities. Cultural changes soon followed.

Agricultural economies were based on the family unit. The Industrial Revolution had a significant impact on the structure and function of the family. The Industrial Revolution placed new demands on the labor of men, women, and children. Workers organized labor unions to fight for improved working conditions and workers' rights.

Capitalism and market competition fueled the Industrial Revolution. Wealth increased the standard of living for some. Social dislocations associated with capitalism produced a range of economic and political ideas, including socialism and communism.
