TWENTY-FIRST CENTURY DYNAMICS OF MULTICULTURALISM Martin Guevara Urbina,2014-09-19 In the twenty first century few studies have delineated the U S multiculturalism story beyond black and white to include the truths and realities of other Americans over time resulting in highly skewed academic publications While the white experience and to a lesser extent the black experience has been well documented the brown experience for instance has been neglected minimized or excluded from the pages of history Clearly there has been a great need for researchers to examine the multiple intertwining forces of historical and contemporary movements defining shaping and governing the everyday experience of America s people In the face of centuries of manipulation exploitation oppression and sometimes brutal violence blacks browns reds yellows and others are still here fighting not only for ethnic and racial tolerance but also for equality justice respect and human dignity In fact despite the long legacy of hate violence and oppression against America s most disadvantaged communities particularly undocumented people the minority population will continue to grow and with pressing demographic shifts ethnic and racial minorities will soon become the new face of America In delineating the dynamics of multiculturalism over the years contributing authors illustrate that the United States is nowhere near a post racial society and thus we must prioritize equality justice and multiculturalism if the U S is in fact going to have a balanced system Globally the United States must actively engage in significant and positive social transformation in the new millennium if the U S is going to be situated and reflective of a post racial society in the twenty first century Twenty First Century Dynamics of Multiculturalism will be of benefit to professionals in the fields of sociology history minority studies Mexican American Chicano studies ethnic Latino studies law political science and also those concerned with sociolegal issues
