Test Highlight Poster Final OVERVIEW The Army will replace the Army Physical Fitness Test APFT with the Army Combat
Fitness Test ACFT as the physical fitness test of record beginning in FY21 To accomplish this the ACFT will be implemented
in three phases Phase 1 Initial Operating Capability IOC includes a limited user Field Test with approximately 60 battalion
sized units from across all components of the Army While the ACFT is backed by thorough scientific research and has
undergone several revisions there are still details that have not been finalized The ACFT requires a testing site with a two
mile run course and a flat field space approximately 40 x 40 meters The field space should be grass well maintained and cut
or artificial turf that is generally flat and free of debris While maintaining testing standards and requirements commanders
will make adjustments for local conditions when necessary The start and finish point for the two mile run course must be in
close proximity to the Leg Tuck station When test events are conducted indoors the surface must be artificial turf only Wood
and rubberized surfaces are not authorized as they impact the speed of the Sprint Drag Carry When environmental
conditions prohibit outdoor testing an indoor track may be used for the 2 Mile Run The Test OIC or NCOIC are responsible to
inspect and certify the site and determine the number of testing lanes There should not be more than 4 Soldiers per testing
group for the SPT HRP and SDC The OIC or NCOIC must add additional lanes or move Soldiers to a later testing session to
ensure no more than 4 Soldiers per testing group Concerns related to Soldiers graders or commanders will be addressed
prior to test day The number of lanes varies by number of Soldiers testing A 16 lane ACFT site will have the following ACFT
specific test equipment requirements 16 hexagon trap bars 60 pounds each with a set of locking collars While all NSN
approved hexagon bars must weigh 60 pounds there is always a small manufacturer s production tolerance The approved
weight tolerance for the hexagon bar is 2 pounds 58 62 pounds Weight tolerance for the hexagon bar and therefore the 3
