Teaching and Learning with Digital Technologies in Higher Education Institutions in Africa Admire

Mare, Erisher Woyo, Elina M. Amadhila, 2022-12-09 This book critically examines how the COVID 19 pandemic has stimulated digital innovation within higher education using case studies from Africa. Imagining a future for post pandemic higher education it analyses the challenges and opportunities of remote teaching and learning. The book explores the structural barriers around access to higher education and how these were reconfigured and amplified by technology dependent teaching and learning. Case studies from countries across Africa provide unique insights into the challenges experienced by Higher Education Institutions HEIs during the COVID 19 pandemic examining examples of emergent pedagogies such as online mobile and social media enhanced teaching and blended learning. The chapters consider online assessment and teacher professional development critically examining some of the benefits and structural challenges of digital technology integration in the context of pre existing education disparities such as students and teachers living in poverty stricken and highly unequal societies. Offering invaluable insights into higher education in Africa the book will be essential reading for researchers scholars and students in the fields of higher education study digital education and educational technology and African and comparative education. It will also be of interest to higher education managers and policymakers.

Change in Higher Education Michael Fremerey, Martina Pletsch-Betancourt, 2006 This anthology offers comprehensive insight into topical issues of change in international higher education. Confronted with the challenge of increasing quality and relevance the individual articles deal with aspects of teaching and learning curriculum development organization and research in the university context. Many of them refer to concrete projects implemented in universities of Latin America Africa and Asia. They were developed in the University Staff Development Programme and run by the Institute for Socio cultural Studies University of Kassel Germany. The anthology is dedicated to Matthias Wessler an active pioneer in change processes in international higher education. The contributors are colleagues in the field of international higher education many of whom have known him as a teacher and mentor. Michael Fremerey studied sociology and political science in Frankfurt am Main Germany Tbingen Germany and Freiburg Germany. He had been research associate at Arnold Bergstraesser Institut in Freiburg and later at the German Institute for International pedagogical research in Frankfurt am Main. For several years he worked as a consultant on questions of development for higher education. Since 1986 he has been professor of sociology at the University of Kassel Germany. Martina Pletsch Betancourt studied international ecological agronomy at the University of Kassel. For several years she worked in Ecuador as a consultant for development cooperation. Her key activities are quality management and change management in higher education. *Nigerian Universities Inaugural Lectures Series*, 2003 Inaugural lectures delivered in the Nigerian University System **Divided We Stand** George P.

Nilson,2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making

expectations clear lowering their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel4 Fosters Higher Order Cognitive Development and Creativity5 Discourages Cheating6 Reduces Student Stress7 Makes Students Feel Responsible for Their Grades8 Minimizes Conflict Between Faculty and Students9 Saves Faculty Time and Is Simple to Administer10 Makes Expectations Clear and Simplifies Feedback for Improvement11 Assesses

Zak,Christopher C. Weaver,1998-02-05 CHOICE 1998 Outstanding Academic Books Grading is one of the thorniest issues writing teachers must deal with yet surprisingly little has been written on this topic As writing teachers move increasingly toward practices that focus on writing as a process they face a growing need to reconsider their systems of grading to determine whether or not these systems support their pedagogies The authors interrogate the grading of individual papers as well as portfolios and the assigning of end of term grades This collection explores the issues and problems that have emerged as conventional grading practices have lagged behind and been challenged by new theories of language While the book will be of interest to theorists Zak and Weaver have also made the book relevant and useful to teachers whose primary interest is the practical consequences of theory in their classrooms Where theoretical discussion takes place the language is clear and accessible Many of the authors write directly from personal experience telling stories of the classroom or writing of new techniques and approaches they have tried They speak with the voices of teachers and the tone and content of their words convey a sense of the immediacy of the topic *A Statewide Elementary and Secondary Grading System* Paul Robert
