Painting Missouri Karen Glines, 2017-08-01 With more counties than most other states Missouri posed a unique challenge for Billy O'Donnell. Setting out to create an outdoor painting on location en plein air for each of Missouri's 114 counties plus the city of St. Louis, this award-winning artist devoted years of travel and logged more than 150,000 miles to capture the many textures of a multifaceted state. *Painting Missouri* is an extraordinarily rich collection of scenes and seasons along the highways and byways of the Show Me State. Turn these pages to find a farmer driving a combine in a Ray County cornfield or the Benedictine convent in Nodaway County or mist rising from snow at sunrise in Prairie State Park. Here are scenes both familiar and intimate: farmhouse and barns, Lover's Leap in Hannibal, and the view of St. Louis from the roof of the Cathedral Basilica. O'Donnell even captured Pierce City before a tornado destroyed the town in 2003 and painted Canton from a vista that another twister had newly opened. Karen Glines provides essential historical information about the counties from interesting facts about their foundings and names to the stories behind their courthouses. Drawing on extensive research in many local historical societies, Glines shares what she learned about the early histories and present concerns of the state's diverse regions, including local anecdotes, Civil War stories, and insights into the roles of Native Americans in regional history. Additional comments by O'Donnell relate some of his experiences while creating the paintings. Paintings and essays combine to create a masterful volume that immerses the reader in the passion that both artist and writer feel for the state's beauty. In *Missouri*, observes O'Donnell, I have found all that an artist needs, and beyond this, I have found an even deeper connection to place. For all who pick up *Painting Missouri*, that connection will surely resound.

Weaponized Lies

Daniel J. Levitin, 2017-03-07 Previously Published as *A Field Guide to Lies*. We're surrounded by fringe theories, fake news, and pseudo facts. These lies are getting repeated. New York Times bestselling author Daniel Levitin shows how to disarm these socially devastating inventions and get the American mind back on track. Here are the fundamental lessons in critical thinking that we need to know and share now. Investigating numerical misinformation, Daniel Levitin shows how mishandled statistics and graphs can give a grossly distorted perspective and lead us to terrible decisions. Wordy arguments on the other hand can easily be persuasive as they drift away from the facts in an appealing yet misguided way. The steps we can take to better evaluate news, advertisements, and reports are clearly detailed. Ultimately, Levitin turns to what underlies our ability to determine if something is true or false: the scientific method. He grapples with the limits of what we can and cannot know. Case studies are offered to demonstrate the applications of logical thinking to quite varied settings, spanning courtroom testimony, medical decision making, magic, modern physics, and conspiracy theories. This urgently needed book enables us to avoid the extremes of passive gullibility and cynical rejection. As Levitin attests, Truth matters. A post-truth era is an era of willful irrationality reversing all the great advances humankind has made. Euphemisms like fringe theories, extreme views, alt truth, and even fake news can literally be dangerous. Let's call lies what they are and catch those making them in the act.
