1	7/64 Hex Key	

The instructions will refer to the following rail diagram when discussing brackets and installation procedures.

The Hawker Monorail Sunvisor System is designed to bolt into your aircraft without drilling any holes or installing specialty fastening devices. There have been a few aircraft where rivnuts or nut plates will be required and we have added 2 A10K80 rivnuts just in case this is the case in your aircraft.

The rail is made in two pieces for ease of installation and after it is installed it appears as one solid unit.

Bring the right and left rail sections into the aircraft and hold the pilot's side roughly in position so that Bracket #3 is picking up the #C screw in the front overhead panel.

Now look at the approximate location of Bracket #2. This bracket is designed to pick up the rear #10 fastener which holds the visor clip in place.

This visor clip on the pilot and copilots side must be replaced. Remove both screws that secure the visor clip and retain the spacers that are present.
