

SAFETY INSTRUCTIONS

AIM OF THIS MANUAL

This manual is designed for use by any skilled worker wishing to use Hawker Lifetech® Modular battery chargers for recharging lead/acid vented, (with or without electrolyte mixing), valve regulated AGM and gel batteries.

This manual provides details of:

- The chargers' functions.
 - Any adjustments required and how to use the chargers.
- When producing this manual, EnerSys® has aimed to provide its information in as simple and precise a manner as possible but cannot assume any responsibility for any misinterpretation. The owner of the equipment is required to retain this manual throughout the equipment's life and to pass it on to any purchaser in the event of its resale. The manufacturer covers the guarantee in accordance with the local regulations (contact local sales organization).

Recommended use

This manual should be read through carefully before using the equipment and also read by anyone likely to use the equipment.

The equipment:

- Presents no obstacles to the free circulation of air through the air inlet and outlet but, nevertheless, should be cleaned of dust every six months by a qualified person.
- Must be used in conformance with its indicated level of protection and never come into contact with water.
- Must be used within the temperature limits stated in the technical characteristics.
- Must not be installed on surfaces subject to vibration (near to compressors, engines, motors).
- Must be installed so that the gases from the battery being charged, do not get sucked into the charger by its fan.

This appliance is not intended for use by persons (including children) with reduced physical and mental capacities, who are not experienced in their use, unless instructed to do so by a person responsible for their safety.

Operator safety

Take all necessary precautions when the equipment will be used in areas where there is the possible risk of an accident occurring. Ensure appropriate ventilation according to standard EN 62453-3 to allow any gases released to escape. Never disconnect the battery while it is being charged.

ELECTRICAL SAFETY

The prevailing safety regulations must be observed. The system protection installed on the power supply to the charger must conform to the charger's electrical characteristics. The installation of a suitable circuit breaker is recommended. It is imperative to ensure that when fuses are being replaced only fuses of the specified type and of the correct are used. It is strictly forbidden to use inappropriate fuses or to short-circuit the fuse holders. This equipment conforms to Class 1 safety standards, which means that the appliance must be earthed and requires to be powered from an earthed supply.

Never open the equipment: High voltage could be still present even turning off the charger.

Any adjustment, maintenance or repairs to the equipment while it is open must only be carried out by an appropriately skilled person who is aware of the risks involved.

Contact one of the company's trained technicians if any problem is encountered when putting the charger into operation. This equipment has been designed for indoor use. It is only designed to recharge lead/acid batteries on industrial premises. When the equipment becomes obsolete, the casings and the other internal components can be disposed of by specialist companies. Local legislation takes precedence over any instructions in this document and must be scrupulously observed (WEEE 2002/96 EC).

EnerSys reserves the right to make any improvements and/or modifications to the product described in this manual at any time and without prior notice and is not obliged under any circumstances whatsoever to update the contents of this manual nor the equipment concerned.

The equipment's production number must be supplied when requiring a service.

If the charger is to be stored before its use, it must be kept carefully sealed in its original packaging. It must be stored in a clean and dry location at a moderate temperature (-20°C to +40°C). Equipment stored at a temperature of less than 15°C must be brought progressively to operating temperature (over a period of 24 hours) to avoid any risk of condensation causing electrical faults (particularly short-circuits).

EU DECLARATION

EnerSys hereby declares that the chargers in the Lifetech Modular range covered by this declaration conform to the descriptions laid down in:

- European Directive 2014/35/EU:
Low Voltage Directive
European Standard:
EN60950-1: 2006+A11:2009+A12:2011+A1:2010+ A2:2013
- European Directive 2014/35/EU:
