

Wealth inequality is present in communities across the US

In only a few areas of the country are the wealthiest 10% of households less than 4 times as wealthy as the median income of their neighbors. In a few areas of the nation, the wealthiest households are 6 or more times as wealthy as the median household in their community. And in some, like small areas of Manhattan in New York City, the wealthiest 10% of households are nearly 120 times as wealthy as their area's median.

Inequality In American Communities:

Inequality in American Communities Richard F. Curtis, Elton F. Jackson, 2013-09-11 Inequality in American Communities is an empirical study of inequality in U S communities and its impact on individual Americans The data for this study come from sample surveys in six American cities differing in size and region In each survey male heads of households were asked about attributes that ranked them in the system of inequality and about a variety of attitudes and behaviors that might be affected by their ranks The analyses seek to determine how social rank affects various attitudes and behaviors and compare these effects from community to community Comprised of 12 chapters this book begins with an overview of theoretical assumptions about community stratification with particular reference to how a person s life is shaped by his position in a local structure of inequality The discussion then turns to patterns of social stratification in six cities Columbus Ohio Linton and Indianapolis Indiana and Yuma Safford and Phoenix Arizona The distributions of various rank variables such as income and education in these cities are described along with the ways in which they are related to form systems of inequality A basic model of the processes of stratification is also presented The remaining chapters explore the consequences of social rank and cover topics ranging from social participation and political ideology to anomia and intolerance This monograph will be of interest to sociologists

Contemporary Asian American Communities Linda Trinh Võ, Rick Bonus, 2009 Once thought of in terms of geographically bounded spaces Asian America has undergone profound changes as a result of post 1965 immigration as

well as the growth and reshaping of established communities This collection of original essays demonstrates that conventional notions of community of ethnic enclaves determined by exclusion and ghettoization now have limited use in explaining the dynamic processes of contemporary community formation Writing from a variety of perspectives these contributors expand the concept of community to include sites not necessarily bounded by space formations around gender class sexuality and generation reveal new processes as well as the demographic diversity of today s Asian American population The case studies gathered here speak to the fluidity of these communities and to the need for new analytic approaches to account for the similarities and differences between them Taken together these essays forcefully argue that it is time to replace the outworn concept of a monolithic Asian America
