Understanding Human Sexuality Hyde; DeLamater, 2016-04-16 Ebook Understanding Human Sexuality **EBOOK: The**
New Primary Care Bernard Dowling, Caroline Glendinning, 2003-10-16 The modernization of the NHS is at the heart of the UK government's policies for public sector services This modernization programme represents the most radical and ambitious restructuring of the NHS since its inception in 1948 The new Primary Care Groups and Trusts PCG Ts are the main organizational mechanism for delivering the modernization agenda and are therefore key to the success or otherwise of these reforms To date there has been no comprehensive evaluation of how PCG Ts have been performing in implementing the modernization programme this book fills that important gap in knowledge It provides a strong text of first evidence about the performance of PCG Ts to date this forms the basis for discussions about future success and a benchmark for future research The New Primary Care will be an essential resource for all advanced students of health care as well as academics researchers and policy makers **EBOOK: ENGAGING TEACHERS** Trevor Gale, Kathleen Densmore, 2003-04-16 This is a useful interesting and valuable work The authors ask the difficult questions and attempt answers which although complex are written in an accessible and open manner It deserves to be widely read Educational Review Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels First as an invitation to teachers to become involved in reconstructing schooling for socially just purposes and in democratic ways From this perspective the politics of engagement is not simply a matter of acquiescence or resistance but is informed by a commitment to generate alternatives teachers parents and students making things happen rather than having things done to them Also signalled is an intent to work collectively exploring and acting on common interests and across uncommon ground Second the book also celebrates teachers engaging in these reconstructive efforts in attractive and meaningful ways The attraction is decisions about schooling made by those they affect as well as decisions that are meaningful because they engage the interests of all **EBOOK: Educational Management in Managerialist Times** Martin Thrupp, Robert Willmott, 2003-08-16 This closely argued and lively polemic is recommended for all policymakers and practitioners concerned with educational leadership and change BJET Thrupp and Willmott have produced a very important book regarding knowledge claims around issues of policy and practice I will be recommending my masters and doctoral students to read the book so that as practitioners they may relish the opportunity to engage with issues of knowledge production Thrupp and Willmott's book is directly relevant to every day practice in teaching and learning across the educational system and it should be required reading for all training programmes because it enables trainees to know and understand the knowledge structures that are being used to control their work and identities BJES will stir a lot of

debate and be seminal to debates about the direction of education management for some time to come Mike Bottery Hull University a genuinely readable and accessible book that critically engages with school management literature InService Education Journal This important and provocative book is not another how to educational management text Instead it offers a critical review of the extensive educational management literature itself The main concern of the authors is that educational management texts do not do enough to encourage school leaders and teachers to challenge social inequality or the market and managerial reforms of the last decade They demonstrate this problem through detailed analyses of texts in the areas of educational marketing school improvement development planning and strategic human resource management school leadership and school change For academics and students Education Management in Managerialist Times offers a critical guide to existing educational management texts and makes a strong case for redefining educational management along more socially and politically informed lines The book also offers practitioners alternative management strategies intended to contest rather than support managerialism while being realistic about the context within which those who lead and manage schools currently have to work This controversial new title brings a new insight to the educational management debate

EBOOK: Sports in Society Jay Coakley, Elizabeth Pike, 2014-04-16 Using a topics based approach organized around provocative questions about the interaction of sports culture and society Sports in Society presents an accessible introduction to research and theory in the sociology of sport This new edition continues the legacy of the previous editions while introducing new material and examples that bring theory to life Current debates in sports such as how youth participation can be increased or sport funding allocated have been integrated throughout the text to provide a holistic view of society An Online Learning Centre accompanies this book offering a range of lecturer support materials as well as resources and tests for students **EBOOK: Older People And Community Care** Beverly Hughes, 1995-09-16 Older People and Community Care sets social and health care practice with older people firmly in the context of the new community care arrangements and the consequent organizational trends towards a market culture However it also questions the relative lack of attention given by professionals to issues of structural inequality in old age compared for example to race and gender Thus the book tackles a double agenda How can community care practice be suffused with anti ageist values and principles Addressing this question the book sets out the foundation knowledge and values which must underpin the development of anti discriminatory community care practice and examines the implications for practitioners in terms of the essential skills and inherent dilemmas which arise Older People and Community Care is essential reading for all those working with and managing services to older people and who aspire to make empowerment for older people a reality ***EBOOK: Childhood and Human Value: Development, Separation and Separability*** Nick Lee, 2005-07-16 At the centre of Nick Lee s new book is a subtle exploration of the separability of adults and children Through this the recent emergence of children as participants in social life is given a fresh perspective one that is unsettling to opponents and proponents of children s rights alike Crucial to

this he addresses the relationship between children and adults as part of their shared but problematic human becoming thus setting out what should in my view be the main terrain of childhood studies This is a book that all scholars of childhood should read and from which they will gain immensely Alan Prout Professor of Sociology University of Stirling For millennia children have been valued as possessions valued by their parents as my child and valued by communities and cultures as belonging to them Recently a new way of valuing children has emerged valuing them as people in possession of themselves as people who have rights This has led to fears that rights will erode love between parents and children and separate children from their communities and cultures Childhood and Human Value explains why people feel this way and argues that they are mistaken Adults in modern societies have separation anxieties about children's rights because they are used to measuring human value against a standard of separateness The more separate you appear to be from the opinions and control of others the more valuable you seem This highly original and accessible book shows us how to resolve the conflict between love and rights in contemporary relationships between adults and children Examining a number of Twentieth Century developmental thinkers including Vygotsky Winnicott Gilligan and Deleuze and Guattari Nick Lee argues that a more flexible and realistic understanding of the sources of human value is available to us based on separability Childhood and Human Value is key reading for students in a variety of fields including sociology of childhood family studies sociology of education psychology of development and childhood studies It is also of interest to professionals who work with children for example social workers teachers and the police

edition of *Social Inequality: Forms, Causes, and Consequences* is an introduction to the study of social inequality. Fully updated statistics and examples convey the pervasiveness and extent of social inequality in the United States. The authors use an intersectional perspective to show how inequality occurs, how it affects all of us, and what is being done about it. With more resources and supplementary examples, exercises, and applications embedded throughout to aid students' learning and visualization of important concepts, the book provides a rich theoretical treatment to address the current state of inequality. In line with current affairs, the authors have expanded the content to include an intersectional approach throughout the chapters, a stronger emphasis on the connections between poverty, wealth, and income inequality, new case studies on the opioid epidemic, COVID-19, the lead poisoning crisis, and climate change, and a new focus on the rise of right-wing movements. With additional content and classroom extensions available online for instructors, *Social Inequality* remains an ideal and invaluable overview of the subject and provides undergraduate students with a robust understanding of social inequality from a sociological perspective.

Under Pressure: The Squeezed Middle Class OECD, 2019-05-01. Middle class households feel left behind and have questioned the benefits of economic globalisation.

The Autonomous Child Ivar Frønes, 2015-10-14. The social sciences offer a variety of theories on how children develop, and various theories and disciplines apply their own vocabularies and conceptualise different aspects of the processes of socialization. This book looks at the theorizing of socialization in sociology, anthropology, psychology, in the life course approach, and as the interplay of genetics and environmental factors. It analyses the dominant perspectives and viewpoints within each discipline and field and shows how the various theories and disciplines apply their own vocabularies and conceptualise different aspects of the processes of socialization. It argues that socialization does not represent a fixed trajectory into a static social order and that different disciplines meet the challenges of complex developmental processes and changing environments in different ways. Socialization is a fundamental concept in sociology, but sociology has only to a limited degree sought to produce a coherent understanding of the processes of socialization, which has to encompass the interplay of societal, psychological, and genetic factors. This book draws the threads together and, by doing so, offers a general framework for our understanding of the socialization process. At the centre of this process is the child as a subject in an interplay with the patterns and significant others of the micro-environment as well as with the macro-conditions of the modern, knowledge-based economies.

The Risky Business of Education Policy Christopher H. Tienken, Carol A. Mullen, 2021-09-09. *The Risky Business of Education Policy* focuses on commentary and analysis on some of the most pressing policy challenges facing public school educators and those invested in a healthy, vibrant public school system. The book shares insights and makes recommendations from leading scholar-practitioners, namely from educational leadership and science education, on ways to ponder, navigate, and challenge serious policy issues. The chapters present important policy topics and critical analysis of the topics from the authorial perspective of experienced educators leading the preparation of future school leaders and teachers. Through fast-paced user

friendly chapters contributors grapple with an education reform policy issue of the day reflecting what is contentious territory while wading through it These educational researchers also make evidence informed practical recommendations for educators and policymakers on how to better approach the policy challenges presented so public education can be improved for all children Each chapter contains stimulating ideas useful information and practical tips for school practitioners higher education faculty and constituent groups
