George N. Kenyon, 2025-09-30 Exploring the concept of quality management from a new point of view this book now in an expanded second edition presents a holistic model of how consumers judge the quality of products It links consumer perceptions of quality to the design and delivery of the final product and presents models and methods for improving the quality of these products and services It offers readers an improved understanding of how and why the design process must consider how the consumer will perceive a product or service In order to facilitate the presentation and understanding of these concepts illustrations and case examples are also provided throughout the book This updated and enlarged volume provides an invaluable resource for managers designers manufacturers professional practitioners and academics interested in quality management The book also offers a useful supplementary text for marketing and quality management courses

The Science of Giving Daniel M. Oppenheimer, Christopher Y. Olivola, 2011-01-19 Americans donate over 300 billion dollars a year to charity but the psychological factors that govern whether to give and how much to give are still not well understood Our understanding of charitable giving is based primarily upon the intuitions of fundraisers or correlational data which cannot establish causal relationships By contrast the chapters in this book study charity using experimental methods in which the variables of interest are experimentally manipulated As a result it becomes possible to identify the causal factors that underlie giving and to design effective intervention programs that can help increase the likelihood and amount that people contribute to a cause For charitable organizations this book examines the efficacy of fundraising strategies commonly used by nonprofits and makes concrete recommendations about how to make capital campaigns more efficient and effective Moreover a number of novel factors that influence giving are identified and explored opening the door to exciting new avenues in fundraising For researchers this book breaks novel theoretical ground in our understanding of how charitable decisions are made While the chapters focus on applications to charity the emotional social and cognitive mechanisms explored herein all have more general implications for the study of psychology and behavioral economics This book highlights some of the most intriguing surprising and enlightening experimental studies on the topic of donation behavior opening up exciting pathways to cross cutting the divide between theory and practice Interest Groups and Lobbying Thomas T.

Holyoke, 2018-09-03 Interest groups and lobbyists play a crucial role in how public policy is made in the United States representative democracy By helping citizens organize and pursue their self interests in the political arena interest groups and lobbyists are an alternative but very effective form of representation However the adversarial nature of interest groups often fuels voter discomfort with the political process *Interest Groups and Lobbying* is an accessible and comprehensive text that examines the crux of this conflict Pulling together two areas of interest group research why advocacy organizations form and how they are able to gain influence in Washington DC Thomas T Holyoke shows students the inner workings of interest groups in the United States Using case studies to clarify and expand on the issues surrounding lobbying and group action in

federal state and local government Holyoke explores how we can use interest groups and their adversarial impulse to achieve the greatest good for the greatest number of people

Six Degrees of Social Influence Douglas T. Kenrick, Noah J. Goldstein, Sanford L.

Braver, 2012-02-08 Over the course of the last four decades Robert Cialdini's work has helped spark an intellectual revolution in which social psychological ideas have become increasingly influential The concepts presented in his book Influence The Psychology of Persuasion have spread well beyond the geographic boundaries of North America and beyond the field of academic social psychology into the areas of business health and politics In this book leading authors who represent many different countries and disciplines explore new developments and the widespread impact of Cialdini's work in research areas ranging from persuasion strategy and social engineering to help seeking and decision making Among the many topics

covered the authors discuss how people underestimate the influence of others how a former computer hacker used social engineering to gain access to highly confidential computer codes and how biology and evolution figure into the principles of influence The authors break new ground in the study of influence
