Teaching First-Year College Students Maggie Murphy,2019-05-15 The first year experience is an emerging hot topic in academic libraries and many librarians who work with first year students are interested in best practices for engaging and retaining them Professional discussion and interest groups conferences and vendor sponsored awards for librarians working with first year students are popping up left and right A critical aspect of libraries in the first year experience is effective information literacy instruction for first year students Research shows that despite growing up in a world rife with technology and information students entering college rarely bring with them the conceptual understandings and critical habits of thinking needed for finding evaluating and ethically using information in both academic and real world contexts Faculty in upper level courses expect students to learn about the research process in

their first year of college and instructors in the first year curriculum expect librarians to teach this to their students Despite all this designing teaching and evaluating effective information literacy instruction specifically for first year students is not necessarily intuitive for instruction librarians That is why *Teaching First Year College Students A Practical Guide for Librarians* is a comprehensive how to guide for both new and experienced librarians interested in planning teaching and assessing library instruction for first year students The book Examines the related histories of library instruction and first year experience initiatives Summarizes and synthesizes empirical research and educational theory about first year students as learners and novice researchers Establishes best practices for engaging first year students through active learning and inclusive teaching Features excerpts from interviews with a number of instruction librarians who work with first year students in a range of positions and instructional contexts Includes examples of activities lesson plans and assessment ideas for first year library instruction for common first year course scenarios Includes a template to use for library instruction lesson planning Written by a library instruction coordinator with a graduate degree in First Year Studies and a first year instruction librarian *Teaching First Year College Students A Practical Guide for Librarians* is the first comprehensive how to guide for both new and experienced librarians interested in planning coordinating teaching and assessing library instruction for first year students

Emerging Strategies for Supporting Student Learning

Barbara Allan, 2016-04-15

Emerging Strategies for Supporting Student Learning provides a straightforward and accessible guide to the latest learning and teaching practices appropriate for use with higher education students. It is both an exciting and challenging time to be working in higher education as the sector experiences rapid changes, including an increasingly diverse student population with changing expectations, changes in technology including the rise in the use of social media, increased emphasis on employability and internationalisation, development of new social learning spaces, as well as an ever-decreasing resource base. As a result of these changes, new approaches to supporting student learning are developing rapidly. In the past five years, developments in both the theory and practice of learning and teaching have created a complex landscape which it is sometimes difficult to navigate. *Emerging Strategies for Supporting Student Learning* provides practical guidance and brings together theory and practice in an accessible style. The book covers a wide range of tools and techniques relevant to face-to-face, blended learning and online practices which will suit students in different contexts, from large groups of 500 to very small classes of research students. This practical book makes extensive use of case studies, examples, checklists and tables, and contains:

- An analysis of the current higher education landscape, the changes that are occurring, and the diverse nature of students' populations.
- An exploration of new theories of digital literacy, including case studies demonstrating how library and information workers have applied these models in practice.
- A demonstration of the many different ways in which academic library and information services are working in support of student employability.
- A theoretical overview of different approaches to teaching and learning, including Kolb's learning cycle, Laurillard's conversational framework for university teaching, Entwistle's teaching for understanding at university, Land and Meyer's threshold concepts, and the Higher Education Academy's work on flexible pedagogies.
- Practical guidance on designing, developing and evaluating courses and other learning and teaching events in different situations, including face-to-face, flipped classroom, blended learning and online.
