A Model Driven Approach to Modernizing Legacy Information Systems Sander Goos, 2012-05 The aging of software is a lingering problem for many companies We know that in new projects Model Driven Engineering can be used to prevent this aging in the future However this does not solve the problems we have today with legacy information systems We propose a general method for the modernization of legacy information systems by

transforming these systems into model driven systems To accomplish a transformation into a model driven system first a model is extracted from the legacy system This model is then transformed into a model driven system using Model Driven Engineering The method is not limited to the data model of the legacy system but is applicable to the entire system It has a best effort character and allows for automatic traceability All these properties are validated with the Thinkwise Software Factory Thinkwise Software develops technical innovations to create smart software applications These applications are self learning easy to use and have an unlimited life expectancy At the time of writing the techniques discussed in this work are implemented further at Thinkwise and have proven their effectiveness in several customer projects

Search-based Information Systems Migration, 2019 Information systems are built to last for decades however the reality suggests otherwise Companies are often pushed to modernize their systems to reduce costs meet new policies improve the security or to be more competitive Model driven engineering MDE approaches are used in several successful projects to migrate systems MDE raises the level of abstraction for complex systems by relying on models as first class entities These models are maintained and transformed using model transformations MT which are expressed by means of transformation rules to transform models from source to target meta models We proposed an intelligent computational search approach to automatically modularize MT We took inspiration from a well defined quality assessment model for object oriented design to propose a quality assessment model for MT in particular The results showed a 45% improvement in the developer s speed to detect or fix bugs and developers made 40% less errors when performing a task with the optimized version
