BEYOND THE BINARY: METAMIND LIBRARIES AND THE DIGITAL REVOLUTION Dr. Umesha Naik & Mr. Meghanandha C, 2024-04-26 Dr. UMESHA NAIK Associate Professor and Chairman of the Department of Library and Information Science at Mangalore University in Mangalagangothri, Karnataka, India, is an eminent academician with a stellar 30-year technical, academic and professional journey. His career soared during an impressive 8-year tenure at the UGC autonomous INFLIBNET Centre in Ahmedabad, spanning from 1994 to 2003. His academic prowess is evidenced by his impressive qualifications: a B.L.I.Sc. from Mangalore University, an M.L.I.S. from IGNOU, a C.I.C. from IGNOU and a Ph.D. from Mangalore University. He also serves as a Research Guide. His expertise spans Information and Communication Technology, Networking, Internet, Web Technologies and Digital and Electronic Libraries, all contributing to his substantial impact on academia reflected in a portfolio of more than one hundred and fifteen (115) published articles and papers in national and international journals, conferences and books. Active involvement in international and national conferences, over 20 resource person roles and participation in 50 workshops, seminars and webinars cement his eminent position and served as Editor for *FROM DEWEY TO DIGITAL EVOLUTION OF LIBRARIES IN THE DIGITAL AGE*. Dr. Naik's membership in prestigious professional associations further underscores his formidable presence in the Library and Information Science domain. *New Perspectives on Technology, Values, and Ethics* Wenceslao J. Gonzalez, 2015-10-08 This book focuses on a key issue today: the role of values in technology, with special emphasis on ethical values. This topic involves the analysis of internal values in technology as they affect objectives, processes and outcomes, and the study of external values in technology, social, cultural, economic, ecological, etc. These values, internal and external, are crucial to the decision-making of engineers. In addition, they have increasing relevance for citizens concerned with the present and future state of technology, which gives society a leading position in technological issues. The book follows three main lines of research: 1) new perspectives on technology, values and ethics; 2) rationality and responsibility in technology; and 3) technology and risks. This volume analyzes the two main sides involved here: the theoretical basis for the role of values in technology and a practical discussion on how to implement them in our society. Thus, the book is of interest for philosophers, engineers, academics of different fields and policy makers. The style used lends itself to a broad audience. **Society 5.0** Alla G. Buller,2014-12-02 Initiate innovation and get things done with a guide to the process of academic change Change Leadership in Higher Education is a call to action urging administrators in higher education to get proactive about change The author applies positive and creative leadership principles to the issue of leading change in higher education providing a much needed blueprint for changing the way change happens and how the system reacts Readers will examine four different models of change and look at change itself through ten different analytical lenses to highlight the areas where the current approach could be beneficially altered The book accounts for the nuances in higher education culture and environment and helps administrators see that change is natural and valuable and can be addressed in creative and innovative ways The traditional model of education has been disrupted by MOOCs faculty unions online instruction helicopter parents and much more leaving academic leaders accustomed to managing change Leading change however is unfamiliar territory This book is a guide to

being proactive about change in a way that ensures a healthy future for the institution complete with models and tools that help lead the way Readers will Learn to lead change instead of simply managing it Examine different models of change and redefine existing approaches Discover a blueprint for changing the process of change Analyze academic change through different lenses to gain a wider perspective Leading change involves some challenges but this useful guide is a strong conceptual and pragmatic resource for forecasting those challenges and going in prepared Administrators and faculty no longer satisfied with the status quo can look to *Change Leadership in Higher Education* for real actionable guidance on getting change accomplished

Robots John M. Jordan, 2016-10-14 An accessible and engaging account of robots covering the current state of the field the fantasies of popular culture and implications for life and work Robots are entering the mainstream Technologies have advanced to the point of mass commercialization Roomba for example and adoption by governments most notably their use of drones Meanwhile these devices are being received by a public whose main sources of information about robots are the fantasies of popular culture We know a lot about C-3PO and Robocop but not much about Atlas Motoman Kiva or Beam real life robots that are reinventing warfare the industrial workplace and collaboration In this book technology analyst John Jordan offers an accessible and engaging introduction to robots and robotics covering state of the art applications economic implications and cultural context Jordan chronicles the prehistory of robots and the treatment of robots in science fiction movies and television from the outsized influence of Mary Shelley's *Frankenstein* to Isaac Asimov's *I, Robot* in which Asimov coined the term robotics He offers a guided tour of robotics today describing the components of robots the complicating factors that make robotics so challenging and such applications as driverless cars unmanned warfare and robots on the assembly line Roboticists draw on such technical fields as power management materials science and artificial intelligence Jordan points out however that robotics design decisions also embody such nontechnical elements as value judgments professional aspirations and ethical assumptions and raise questions that involve law belief economics education public safety and human identity Robots will be neither our slaves nor our overlords instead they are rapidly becoming our close companions working in partnership with us whether in a factory on a highway or as a prosthetic device Given these profound changes to human work and life Jordan argues that robotics is too important to be left solely to roboticists

Information and Communications Technology in Romania - Comparative Analysis with the EU, Social Impact, Challenges and Opportunities, Future Directions Nicolae Sfetcu, 2024-11-21 The modern global technological landscape is shaped by rapid advances and interconnectivity, leading to a complex ecosystem of innovation, competition, and collaboration. Significant developments are being seen in artificial intelligence, telecommunications, biotechnology, and energy technologies. Digitalization is redefining industries such as healthcare, transport, and finance, while cross-border data flows and 5G infrastructure are accelerating global connectivity. Key players such as the United States, China, and Japan are investing heavily in research and development, pushing the capabilities of AI and quantum computing further. These nations have adopted strategic initiatives to increase their technological self-confidence and ensure that their companies remain at the forefront of innovation. The European Union is positioned as a distinct player in the global technological landscape, aiming to stimulate innovation while ensuring trust, privacy, and sustainability. By leveraging its regulatory power, investing in digital infrastructure, and increasing collaboration between Member States, the EU is seeking to increase its strategic autonomy and competitiveness in the face of rapid technological change. Romania has seen significant development in its technology sector over the past two decades. Driven by a combination of government support, a well-educated workforce, and strategic positioning within the European Union, Romania is increasingly making its mark on the technology scene. This study provides an overview of current global technology trends and the state of technology resources in the European Union and in Romania, in particular, analyzing the strengths and weaknesses of the sector and highlighting the opportunities and challenges ahead.

DOI 10.58679/MM91317 *Enabling Enterprise Transformation* Nagy K. Hanna, 2009-12-11 Private enterprises in advanced economies have been learning to use information and communication technology (ICT) to innovate and transform their processes, products, services, and business models, significantly improving productivity and competitiveness. Moreover, the ICT industry itself has become a major source of job creation and a contributor to economic growth and business transformation. A key question today is whether and how developing countries can learn to benefit from the ICT revolution and what roles the government and private sector can play. Already, a number of developing countries have been inspired by the example of India and China and are now seeking to jump on the outsourcing bandwagon. Nevertheless, with few exceptions in the developing world, little attention has been paid by policymakers and practitioners to invest systematically and proactively in

ICT enabled growth poverty reduction and grassroots innovation Most communities and small and medium sized enterprises in developing countries for example face multiple constraints to adopting and leveraging this general purpose technology and lack the capabilities for maximizing its potential In Enabling Enterprise Transformation Nagy Hanna draws on his rich experience of over 35 years at the World Bank and other aid agencies as a development strategist and ICT policy expert the most current research and best practices from around the world to provide practical tools for promoting economic and social transformation through ICT He assesses various initiatives to develop and diffuse ICT such as innovation funds incubators parks public private partnerships and comprehensive promotion programs He argues for the strategic options now open for developing countries to participate in ICT production to deploy ICT to transform industries and services and to leverage ICT as a new national infrastructure for improving the business environment and enhancing the competitiveness of the whole economy The challenge for leaders in developing countries is to create such social and institutional dynamics for learning about ICT use and adaptation at many levels Lessons gained so far from programs to build these social learning and innovation capabilities at the institutional and grassroots levels should be shared among developing countries and a dialogue among business leaders policymakers development agencies educational institutions and the general citizenry must be advanced
