MLA International Bibliography of Books and Articles on the Modern Languages and Literatures, 2006 **Entre la voz y el silencio** Margit Frenk Alatorre, 1997 **Melancholy and Culture** Roger Bartra, 2008 During the late sixteenth and seventeenth centuries texts on melancholy began to circulate in Europe aimed at the general reading public and not purely for specialists in mental illness The first book on melancholy written in vernacular language was the *Libro de la melancolia* by Spanish doctor Andres Velasquez This book takes his work as a starting point from which to study the broad panorama of melancholy in Spain in the period and goes on to examine the importance of melancholy in Cervantes' *Don Quixote* and also examines the criticisms directed at Velasquez's work by Dr Juan Huarte de San Juan in the *Examen de ingenios para las ciencias* known in English as *Trial of Wits* Roger Bartra's history explores the relation between culture and melancholy using as his framework the notion that culture is not the antidote

against the chaos of melancholy or that the culture of melancholy can be studied in isolation rather than he sees culture as melancholy and melancholy as culture Jacket

Spain and the Western Tradition Otis Howard Green, 1963 The late Renaissance in Spain was a period of progressive military, diplomatic, and social defeat, and the spirit of the Spaniards moving from confidence to doubt reflected a growing disillusion with grandeur. After an examination of optimism and pessimism in terms of the baroque period, Professor Green discusses desengaño (disillusion) as a related and prevalent factor. In its positive aspect, disillusion was a form of wisdom that the Stoic Sapiens, who was fully aware of what constituted the supreme good and was enticed by nothing else, found. The factors are apparent in the Spanish attitude toward death. When he writes in seriousness, the Spaniard of the baroque period recognizes death as the obedient executor of the will of a just and merciful God. Thus, the concept of the Spanish seventeenth century as one of total despair collapses in the presence of the evidence adduced. Far removed from attitudes of despondency, the originality of Spain's literary accomplishments reached full tide in the baroque period, a literary age characterized by the growth of a new sophistication. The use of brilliant metaphor, allegory, double and triple meanings of words to form bridges of intellectual association is the result of a consistent growth that developed inevitably from the Renaissance style.
