The History of Media and Communication Research David W. Park, Jefferson Pooley, 2008 Strictly speaking James Carey wrote there is no history of mass communication research This volume is a long overdue response to Carey's comment about the field's ignorance of its own past The collection includes essays of historiographical self-scrutiny as well as new histories that trace the field's institutional evolution and cross-pollination with other academic disciplines The volume treats the remembered past of mass communication research as crucial terrain where boundaries are marked off and futures plotted The collection intended for scholars and advanced graduate students is an essential compass for the field

Social impact of media discourse in the age of iDeology. A perspective from the global periphery Martin A. M. Gansinger, 2019-05-23 In the age of iDeology in which individual access and participation to technology is about to replace the rich texture of religion culture tradition and political convictions the social impact of media discourse only magnifies This volume is an attempt to explore the influence of ever available communication content on the minds and behavior of a population that has made the permanent and often obsessive use of communication technology a defining element of social orientation Unlike the many accounts that focus on the remarkably redefined patterns in the context of Western society ranging from twittering Presidents to the emerging populist movements all over Europe this volume portrays the situation from the frequently neglected perspective of the global periphery As opposed to simply transfer and measure perspectives taken from a Western point of view the clear intention of this volume is to provide ample space for the sincere and explorative consideration of local characteristics and settings of the different social cultural and political contexts and therefore contribute to providing the ground for future research
