assessment and treatment are currently visible in the forensic field in three relatively separate areas the use of
neuropsychology biomarkers and wearables and VR technology in forensic mental health These areas individually can make a
valuable contribution to improving forensic assessments and treatment but combined they might even have a greater impact
For example heart rate variability a biomarker can be visualized during Virtual Reality VR scenarios to increase patients
insights into their physiological responses With our topic New Directions in Forensic Psychology Applying Neuropsychology
Biomarkers and Technology in Assessment and Intervention we hope to offer more insight into the state of scientific
developments in the aforementioned areas as they relate to forensic psychology As a result we hope to be able to pinpoint
