Networking And Mobile Computing Xicheng Lu, 2005-07-20 Welcome to Zhangjiajie for the 3rd International Conference on Computer Network and Mobile Computing ICCNMC 2005 We are currently witnessing a proliferation in mobile wireless technologies and applications However these new technologies have ushered in unprecedented challenges for the research community across the range of networking mobile computing network security and wireless web applications and optical network topics ICCNMC 2005 was sponsored by the China Computer Federation in cooperation with the Institute for Electrical and Electronics Engineers IEEE Computer Society The objective of this conference was to address and capture highly innovative and state of the art research and work in the networks and mobile computing industries ICCNMC 2005 allowed sharing of the underlying theories and applications and the establishment of new and long term collaborative channels aimed at developing innovative concepts and solutions geared to future markets The highly positive response to ICCNMC 2001 and ICCNMC 2003 held in Beijing and Shanghai respectively

encouraged us to continue this international event In its third year ICCNMC 2005 continued to provide a forum for researchers professionals and industrial practitioners from around the world to report on new advances in computer network and mobile computing as well as to identify issues and directions for research and development in the new era of evolving technologies

Massively Multi-Agent Systems II Donghui Lin,Toru Ishida,Franco Zambonelli,Itsuki Noda,2019-05-18 This book contains revised selected and invited papers presented at the International Workshop on Massively Multi Agent Systems MMAS 2018 held in Stockholm Sweden in July 2018 The 7 revised full papers presented were carefully reviewed and selected for inclusion in this volume Also included are 3 post workshop papers The papers discuss enabling technologies new architectures promising applications and challenges of massively multi agent systems in the era of IoT They are organized in the following topical sections multi agent systems and Internet of Things architectures for massively multi agent systems and applications of massively multi agent systems

Introduction to IoT Sudip Misra,Anandarup Mukherjee,Arijit Roy,2021-06-10 IoT is emerging as a popular area of research and has piqued the interest of academics and scholars across the world This book serves as a textbook and a single point of reference for readers looking to delve further into this domain Written by leading experts in the field this lucid and comprehensive work provides a clear understanding of the operation and scope of the IoT Along with the description of the basic outline and technologies associated with the subject the book discusses the IoT case studies and hands on exercises enabling readers to visualise the vastly interdisciplinary nature of its applications The book also serves curious non technical readers enabling them to understand necessary concepts and terminologies associated with the IoT

Adsensory Financialisation Pamela Odih,2016-09-23 Adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies It argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Adsensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism s production of signs which dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing

the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations Paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantal technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimilating the limits of financialisation are beginning to emerge

BPM Everywhere Nathaniel Palmer, Scott Francis, Peter Whibley, Surendra Reddy, Peter Fingar, Dr Setrag Khoshafian, Larry Hawes, Charles Webster, Vinay Mummigatti, Roy Altman, James Taylor, Joseph B. Lail, Keith D. Swenson, Rudiger Pryss, Stuart Chandler, David RR Webber, Mark Casey, Wil van der Aalst, Dr Anne Rozinat, Matthias Walter, Mara Nikolaidou, Alberto Manuel, 2019-10-23 We are entering an entirely new phase of BPM the era of BPM Everywhere or BPME BPME represents the strategy for leveraging not simply surviving but fully exploiting the wave of disruption facing every business over the next 5 years and beyond Without question one of the single most disruptive events in the last decade was the introduction of the smartphone Consider for a moment how great of an impact this has had on the relationship between businesses and their customers Not even the emergence of the Web and Internet based digital native business models can compare with the level of intimacy now available with your customers In the era of the Internet of Things where smart homes appliances cars phones virtually imaginable devices are all connected BPM must and will be everywhere As Peter Whibley discusses in The Internet of Things Will Be Invisible by 2025 there are expected to be more than 26 billion or more connected devices In the chapter Digital

Prescriptive Maintenance Disrupting Manufacturing through IoT Big Data and Dynamic Case Management Dr Setrag Khoshafian introduces the 4 Vs of thing data specifically Volume Velocity Variety and Value From monitors and remote sensors to appliances and vehicles to tens of billions of other things connected devices are generating meaningful and informative data that would easily overwhelm any human being but collectively they present critical context about processes and the state of operations Big Data has never been so large nor presented such an acute role within enterprises and the processes that drive them BPME as well as traditional BPM methods can already be found at the center of this Its role will grow exponentially Emergent factors such as process mining see chapter Mining the Swarm by Keith Swenson et al will be critical for uncovering engagement patterns and the need for process management platforms to coordinate interaction and control of smart devices It is intelligent BPM that is expanding the window of what can be automated by enabling adaptable automation The mobile strategies in far too many organizations seem to be the building of apps that presume that customers will use their smartphones like mini laptops This avoids the fact that we now have a level of intimacy with our customer we ve never had before As discussed in the chapter BPM to Go Supporting Business Processes in a Mobile and Sensing World our customers are carrying around a device that offers a range of capabilities unlike any laptop A smartphone produces volumes of meaningful data about our customers think about the 4Vs and is able to interact with that customer in ways that a laptop never can The growing ubiquity of connectivity always within reach combined with new services and capabilities such as mobile banking is a key part of driving constantly changing expectations Yet digital disruption is not limited to mobile devices and is in fact disrupting everywhere BPM is otherwise found and why BPM everywhere is becoming the new normal
