Governments' Responses to the Covid-19 Pandemic in Europe Kennet Lynggaard, Mads Dagnis Jensen, Michael Kluth, 2022-12-01 This book examines similarities and differences in 31 European governments responses to the COVID 19 pandemic The COVID 19 pandemic hit Europe in early 2020 It spread across the continent during the Spring while anxious electorates were treated to news reports about health systems under duress and frustrated attempts by public procurement officials to obtain adequate supplies of medical and protective equipment Over the next 15 18 months considered by this book national responses exhibited both similarities and profound variations as the different endeavours to regulate social interactions constituted a stress test for political systems across Europe

Electronic Government Efthimios Tambouris, Marijn Janssen, Hans Jochen Scholl, Maria A. Wimmer, Konstantinos Tarabanis, Mila Gascó, Bram Klievink, Ida Lindgren, Peter Parycek, 2015-08-10 This book constitutes the refereed proceedings of the 14th IFIP WG 8 5 International Conference on Electronic Government EGOV 2015 held in Thessaloniki Greece in August September 2015 in conjunction with the 7th International Conference on eParticipation ePart 2015 The 25 revised full papers presented were carefully reviewed and selected from 53 submissions The papers have been organized in the following topical sections foundations open and smart government services processes and infrastructure and application areas and evaluation

Upgrading Fiscal Frameworks in Asia-Pacific Enrique Flores, Pranav Gupta, Miss Yinqiu Lu, Mr. Paulo A Medas, Dinar Prihardini, Hoda Selim, Weining Xin, Mr. Masafumi Yabara, 2024-09-16 This paper seeks to guide the reform of fiscal frameworks in Asia Pacific in the context of calls for a more active fiscal policy in a shock prone world It highlights that the cost of fiscal support is large and that fiscal frameworks including fiscal rules are being put to the test given the sharp increase in debt high interest and weaker growth prospects The stress is only compounded by long term challenges like aging populations climate change and the need to deliver on the sustainable development goals In this context it is timely to review the effectiveness of fiscal policy in Asia Pacific and seek for ways to strengthen fiscal frameworks After the global financial crisis fiscal policy in Asia Pacific became more countercyclical and stronger than in other regions especially in advanced economies The paper shows that the degree of countercyclicality has been asymmetric with larger responses during periods of weak growth and in particular in response to large shocks the global financial crisis and the pandemic It highlights that responses to the pandemic were large and used a wide range of tools and how fiscal and monetary policy complemented each as they responded to large shocks It looks into the deterioration of debt dynamics in Asia Pacific as public debt has been rising persistently across most countries driven by declining growth and rising deficits particularly after the global financial crisis for advanced economies and after the pandemic for emerging market and low income countries The paper reviews fiscal frameworks across Asia Pacific including the use of fiscal rules medium term fiscal frameworks and fiscal councils It describes the characteristics of fiscal rules which usually focus on debt and budget balances and are set by law but tend to lack well specified enforcement mechanism or escape clauses It highlights that

compliance with the rules has worsened following the pandemic as in contrast with the outturns before the pandemic Asia Pacific countries tend to show larger deviations relative to other regions It also shows that despite the increase adoption of medium term fiscal frameworks in Asia Pacific forward guidance has been hampered by the lack of binding targets and ex post analysis Moreover they do not seem to have resulted in better macro fiscal forecast in part due to weak capacity and enforcement lack of integration with the annual budget and exposure to shocks with risk analysis mostly limited to qualitative discussions Proposed reforms seek to implement a comprehensive risk based approach to public finances They focus on strengthening the medium term orientation of fiscal policy through credible medium term fiscal plans fiscal rules linked to the medium term strategy and the annual budgets and a stronger reliance on fiscal councils They also emphasize the need for a broader view of the public sector as fiscal policy is being conducted through multiple channels which requires assessing and managing vulnerabilities and a significant improvement in fiscal statistics They also address aging and climate change by focusing on assessing large intergenerational trade offs reporting on long term debt dynamics and on green medium term fiscal frameworks that incorporate the effects of climate change and climate policies **Princip Microeconomics Test B**
