Entrepreneurship, Technological Upgrading and Innovation Policy in Less Developed and Peripheral Regions Ivano Dileo, Manuel González-López, 2019-01-01 This special issue of the journal tries to shed light on how innovation processes

occur in less developed regions by examining which factors affect these processes and how they differ substantially between the less developed and the more developed areas in Europe. There are significant differences in innovation capacity among the lagging peripheral and the more developed regions. Recently the downgrading of traditional manufacturing and districts based models in Europe has also highlighted the importance of enhancing relationships between the global and local regional networks of entrepreneurs and innovators. The transfer of resources alone is not enough to create competitive regional economies in a global world. In this regard innovation policy may be crucial in designing new paths for development and increasing innovation in peripheral regions. The issue consists of six articles. All of the papers focus on analyzing various aspects of the less developed and peripheral areas within a European context and look at innovation issues from different research perspectives and methods. In particular four papers are related to innovation in SMEs and Smart Specialisation Strategy innovation and the regional allocation of coordination participation in projects across EU regions innovation policy and firm absorptive capacities and innovation linkages with path development in rural areas. One article is based on the relationship between family firms and the propensity to invest in innovation comparing the more and less developed macro geographical areas. The final paper concerns the nexus between policy planning and the local business ecosystems innovative and competitive competence. The first paper by Lukasz Arendt and Wojciech Grabowski focuses on indirectly assessing the impact of innovation policies conducted in Polish NUTS 2 regions within the framework of Regional Innovation Systems and Smart Specialisation Strategy. Interestingly the authors combine firm level data with meso data in a multilevel setting and observe that Polish SMEs in less developed regions mostly depend on in house capabilities rather than on regional innovative potential to introduce different types of innovations. Another observation is that Polish SMEs are more likely to innovate if they have an RD department a higher quality of labor realized investments and they use ICT. Finally regional policies in these less developed regions should focus more on linking firm level factors with regional innovation systems so as to enhance companies innovation capacity. The article by Pedro Varela Vázquez Manuel González López and María del Carmen Sánchez Carreira presents a consistent descriptive analysis concerning the regional allocation of coordination and participation in projects under the 6th and 7th Framework Programmes (FPs) as well as the funds allocated by the ongoing Horizon 2020. By comparing the 6th and 7th FPs the authors show the existence of a slight reduction in the disparities in particular due to the higher participation of regions from Spain Portugal and Italy. The results show some interesting insights as it emerges that developed regions account for most of the participation in projects and funds from the FP instruments. Concerning less developed regions an uneven geographical distribution of projects and funds leads to the reinforcement of pre existing industrial and innovation hubs. The third paper is by Marco Pini. The author investigates whether in less developed regions family businesses run by outside managers show a higher propensity to innovate investing in Industry 4.0 than those where the managers are family members. This research focuses on the impact of digital innovation between the less developed

Italian regions Southern and the more developed regions the Centre North The results show that in Southern Italy family businesses are more likely to invest in digital technologies when the firm is run by an external manager and spends on RD However in less developed regions RD requires new competencies and capabilities Hence innovation policies should be based on specific innovation patterns defined within individual regions not only in terms of RD incentives but also in encouraging apolicy mix approach that is not entirely based on RD and technology issues The fourth paper written by Agn Paliokait refers to the regional innovation paradox i e the low absorption capacity of public funds for innovation shown by less developed region The author has carried out an analysis of innovation policies applied to central and eastern European countries between 2007 and 2013 She finds that policies hardly promote structural changes as they mainly focus on improving the capacities of mature sectors and on adopting existing technologies In this sense the results suggest that amore tailored approach to innovation capacity building is needed taking into account the current capacity levels within the target groups The fifth paper by Merli Reidolf and Martin Graffenberger analyses the role of local resources for firm innovation and path development in rural areas Based on the case of Estonia they find that rural resources physical human immaterial social and community and financial have the potential to extend and upgrade regional development paths and to enrich existing paths with additional functions However merely relying on rural resources to facilitate substantial changes in regional paths does not suffice Finally the sixth paper which has been written by Charis Vlado and Dimos Chatzinikolaou analyses the case of business ecosystem policy from aphysiological and evolutionary perspective the so called Strategy Technology and Management which represents the organic center of the produced innovation inside asocioeconomic organism By studying the case of the Eastern Macedonia and Thrace region one of the less developed regions in Greece they present an introductory and qualitative field research The authors outline anew possible direction for policy planning and implementation in order to expand the local business ecosystems innovative and competitive competence especially in the context of aless developed region by the usage of the ILDI Institutes of Local Development and Innovation mechanism We would sincerely like to thank the authors for their contributions to this special issue The articles offer us the opportunity to evaluate various facets underneath innovation issues within the context of different peripheral areas We also thank all the reviewers for their commitment and for contributing to improving the quality and reliability of the articles Finally our special thanks go to the Editor in Chief Prof Anna Ujwary Gil for her tireless and valuable effort in producing this journal And lastly we hope that all of our readers around the world find these articles an inspiration to conduct more research on these topics in the future

Cooney,2020-04-29 It is not widely understood that the importance of small businesses only became apparent with the publication of David Birch's book The Job Generation Process in 1979 Over the past four decades governments across the globe have struggled to design implement and evaluate policies that benefit the development of small firms Deciding whether macro or micro policies are more appropriate for a given context has usually created an initial challenge for policy makers However a cause for even greater dispute has been determining and agreeing what might be the preferred outcomes of such policies e g more firms better performing firms fewer firm failures job creation greater productivity higher levels of innovation inclusivity of disadvantaged groups Furthermore evaluating the impact of specific policies presents a wide range of difficulties since it is impossible to isolate a simple cause and effect relationship between policy and its stated goal This book explores the

development of small business policy in five countries across five continents and seeks to develop a deeper understanding regarding how small business policy has evolved in these countries and what we might learn from their experiences This book was originally published as a special issue of Small Enterprise Research *Understanding the Social Economy and the Third Sector* Simon Bridge, Brendan Murtagh, Ken O'Neill, 2020-05-13 Understanding the Social Economy and the Third Sector fills a significant gap by bringing together a comprehensive range of topics in one resource Students will gain a working knowledge of the social economy and social capital illustrated by comparison with the private and public sectors and real world examples *Handbook of Research on Value Creation for Small and Micro Social Enterprises* Maher, Chi, 2018-12-07 In the corporate world businesses are focused on increasing their revenues but ignore the cries of social and environmental concerns from nearby communities At the other end of the spectrum nonprofits seek to help their local communities but are constantly required to create fundraisers without having adequate time to put those collected donations to use The world needs an industry to combine civic engagement and public service with wealth and value creation to provide self sustaining opportunities for public services that are sometimes overlooked or ignored The Handbook of Research on Value Creation for Small and Micro Social Enterprises defines the concept of social enterprise and provides vital insight into the importance of rebalancing creating and promoting economic activities that achieve social fairness cultural fulfillment and the protection of the environment While highlighting topics such as marketing strategies cross cultural frameworks and public policy this publication focuses on empowering rather than controlling sustainable solutions for various communities and consumers This book is ideally designed for researchers policymakers academicians who teach and or research small and micro social enterprises and advanced level students furthering their research exposure to pertinent topics in this field

**Toward Resilient Communities** Christopher L. Atkinson, 2013-11-12. In June 2011, the city of Minot, North Dakota, sustained the greatest flood in its history. Rather than buckling under the immense weight of the flood, on a personal and community level, government, civic groups, and citizens began to immediately assess and address the event's impacts. Why did the disaster in Minot lead to government and community resilience, whereas

during Hurricane Katrina the non resilience of the government and community of New Orleans resulted in widespread devastation This book seeks to answer that question by examining how local government institutions affect pre and post disaster community and business resilience Utilizing both survey methods and interviews Atkinson analyzes the disasters that occurred in New Orleans Louisiana Palm Beach County Florida and Minot North Dakota He argues that institutional culture within local government impacts not only the immediate outcomes experienced during response but the long term prognosis of recovery for a community outside the walls of city hall Understanding tendencies within a community that lead to increased vulnerability of both individuals and businesses can lead to shifts in governmental community priorities and potentially to improved resilience in the face of hazard events Relevant to scholars of public administration disaster researchers and government officials this book contributes to a growing literature on community and business resilience It explores not just the devastation of natural disasters but profiles governmental impacts that led to responsive and able processes in the face of disaster
