Geographies of Drugs and Alcohol Christopher M. Moreno, Robert Wilton, 2014-03-05 The consumption of drugs and alcohol and the pleasures and problems arising from this consumption can be understood as embedded and constitutive elements of social family and recreational life. At the same time they are key sites of intervention for a broad array of state and non-state actors focused on regulation, treatment, and recovery. This edited volume showcases current research on the complex social and cultural geographies of drugs and alcohol. Taking an avowedly critical approach, the authors draw from a variety of theoretical traditions to explore the socially and spatially embedded nature of alcohol and drug consumption, regulation, and treatment, and the ways in which these give rise to particular lived experiences while foreclosing on others. Together, the chapters question taken-for-granted assumptions about the nature of and motivations for drug and alcohol use and pay direct attention to both the intended and unintended consequences of regulation and treatment initiatives. Despite, and in part because of, this critical stance, chapters hold immediate implications for drug and alcohol policy and public health interventions. This book was originally published as a special issue of *Social and Cultural Geography*. **The Imperative of**

Health Deborah Lupton, 1995-06-15 In this reappraisal of public health and health promotion in contemporary societies, Deborah Lupton explores public health and health promotion using contemporary sociocultural and political theory, particularly that building on Foucault's writings on subjectivity, embodiment, and power relations. The author examines the implications of the new social theories for the study of health promotion and health communication to analyze the symbolic nature of public health practices and explores their underlying meanings and assumptions. **Fluid Geographies** K. Maria D. Lane, 2024-07-18 Maria Lane's *Fluid Geographies* traces New Mexico's transition in the pre-statehood era from community-based water management to an expert-led structure controlled by engineers and bureaucrats. To understand this shift, Lane carefully examines the chief conflict of the period, which pitted Indigenous and Nuevomexicano communities with their long-established and locally organized systems of irrigation management against Anglo-American settlers with their Progressive-era preference for scientific expertise and centralized bureaucratic management of water. The newcomers succeeded in imposing their will, though disputes over water rights wended their way through the district courts of New Mexico's Rio Grande watershed for many years. Lane has gathered the records of more than 125 such cases, which she uses as the basis for a spatial analysis of evolving cultural patterns and attitudes toward water use and management in this time and place.

Ultimately Lane shows that modernist water policy both reflected and helped construct a racialized understanding of scientific expertise and in the process legitimized the dispossession of Indigenous and Nuevomexicano communities throughout the Rio Grande watershed

The Rule of Freedom Patrick Joyce, 2020-05-05 The liberal governance of the nineteenth century state and city depended on the rule of freedom As a form of rule it relied on the production of certain kinds of citizens and patterns of social life which in turn depended on transforming both the material form of the city its layout architecture infrastructure and the ways it was inhabited and imagined by its leaders citizens and

custodians Focusing mainly on London and Manchester but with reference also to Glasgow Dublin Paris Vienna colonial India and even contemporary Los Angeles Patrick Joyce creatively and originally develops Foucauldian approaches to historiography to reflect on the nature of modern liberal society His consideration of such artifacts as maps and censuses sewers and markets public libraries and parks and of civic governments and city planning are intertwined with theoretical interpretations to examine both the impersonal often invisible forms of social direction and control built into the infrastructure of modern life and the ways in which these mechanisms shape cultural and social life and engender popular resistance
