Privacy and Technologies of Identity Katherine J. Strandburg, Daniela Stan Raicu, 2005-09-16 Privacy and Technologies of Identity A Cross Disciplinary Conversation provides an overview of ways in which technological changes raise privacy concerns It then addresses four major areas of technology RFID and location tracking technology biometric technology data mining and issues with anonymity and authentication of identity Many of the chapters are written with the non specialist in mind seeking to educate a diverse audience on the basics of the technology and the law and to point out the promise and perils of each technology for privacy The material in this book provides an interface between legal and policy approaches to privacy and technologies that either threaten or enhance privacy This book grew out of the Fall 2004 CIPLIT r Symposium on Privacy and Identity The Promise and Perils of a Technological Age co sponsored by DePaul University s College of Law and School of Computer Science Telecommunications and Information Systems The Symposium brought together leading researchers in advanced technology and leading thinkers from the law and policy arenas many of whom have contributed chapters to the book Like the Symposium the book seeks to contribute to a conversation among technologists lawyers and policymakers about how best to handle the challenges to privacy that arise from recent technological advances

Rhumb Lines and Map Wars Mark Monmonier, 2010-11-15 In Rhumb Lines and Map Wars Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator s legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth s roundness As Monmonier shows mariners benefited most from Mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection s popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of

one of cartography's most significant innovations With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps Rhumb Lines and Map Wars is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time
