The Places and Spaces of News Audiences Chris Peters, 2018-04-19 Historically or so we would like to believe the story of everyday life for many people included regular definitive moments of news consumption Journalism in fact was distributed around these routines papers were delivered before breakfast the evening news on TV buttressed the transition from dinner to prime time programming and radio updates were centred around commuting patterns These habits were organized not just around specific times but occurred in specific places following a predictable pattern However the past few decades have witnessed tremendous changes in the ways we can consume journalism and engage with information from tablets to smartphones online and so forth and the different places and moments of news consumption have multiplied as a result to the point where news is increasingly mobile and instantaneous It is personalized localized and available on demand Day by day month by month year by year technology moves forward impacting more than just the ways in which we get news These fundamental shifts change what news is This book expands our understanding of contemporary news audiences and explores how the different places and spaces of news consumption change both our experiences of journalism and the roles it plays in our everyday lives This book was originally published as a special issue of Journalism Studies

The 3-D Global Spatial Data Model Earl F. Burkholder, 2008-04-15 Traditional methods for handling spatial data are encumbered by the assumption of separate origins for horizontal and vertical measurements Modern measurement systems operate in a 3 D spatial environment The 3 D Global Spatial Data Model Foundation of the Spatial Data Infrastructure offers a new model for handling digital spatial data the global spatial data model or GSDM The GSDM preserves the integrity of three dimensional spatial data while also providing additional benefits such as simpler equations worldwide standardization and the ability to

track spatial data accuracy with greater specificity and convenience This groundbreaking spatial model incorporates both a functional model and a stochastic model to connect the physical world to the ECEF rectangular system Combining horizontal and vertical data into a single three dimensional database this authoritative monograph provides a logical development of theoretical concepts and practical tools that can be used to handle spatial data more efficiently The book clearly describes procedures that can be used to handle both ECEF and flat Earth rectangular components in the context of a rigorous global environment *Semantic Web: Ontology and Knowledge Base Enabled Tools, Services, and Applications* Sheth,

Green IT: Technologies and Applications Jae H. Kim,Myung J. Lee,2011-07-25 This book is the first of its kind in

presenting comprehensive technical issues and solutions for rapidly growing Green IT. It brings together in a single volume both green communications and green computing under the theme of Green IT and presents exciting research and developments taking place therein in a survey style. Written by the subject matter experts consisting of an international team of recognized researchers and practitioners in the field, Green IT Technologies and Applications will serve as an excellent source of information on the latest technical trend of Green IT for graduate undergraduate students, researchers, engineers and engineering managers in the IT, Electrical, Communications, Computer Engineering, Computer Science, Information Science as well as interdisciplinary areas such as sustainability, environment and energy. The book comprises three parts: Green Communications, Green Computing and Smart Grid and Applications. Part I: Green Communications deals with energy efficient architectures and associated performance measures in wireless communications. It covers energy issues in PHY, MAC, Routing, Application layers and their solutions for a variety of networks. Part II: Green Computing deals with various energy issues in data centers, computing clusters, computing storage and associated optimization techniques. Energy management strategies are presented to balance between energy efficiency and required qualities of services. Part III: Smart Grid and Applications presents an overview and research challenges for smart grid. Applications include modeling of urban pollutant for transportation networks, Wireless Sensor Network (WSN) architecture with long range radio and Green IT standards.

Network Magazine, 2005 Multimedia Interaction and Intelligent User Interfaces Ling Shao, Caifeng Shan, Jiebo Luo, Minoru Etoh, 2010-09-11. Consumer electronics (CE) devices providing multimedia entertainment and enabling communication have become ubiquitous in daily life. However, consumer interaction with such equipment currently requires the use of devices such as remote controls and keyboards which are often inconvenient, ambiguous and non interactive. An important challenge for the modern CE industry is the design of user interfaces for CE products that enable interactions which are natural, intuitive and fun. As many CE products are supplied with microphones and cameras, the exploitation of both audio and visual information for interactive multimedia is a growing field of research. Collecting together contributions from an international selection of experts including leading researchers in industry, this unique text presents the latest advances in applications of multimedia interaction and user interfaces for consumer electronics. Covering issues of both multimedia content analysis and human machine interaction, the book examines a wide range of techniques from computer vision, machine learning, audio and speech processing, communications, artificial intelligence and media technology. Topics and features introduced: novel computationally efficient algorithms to extract semantically meaningful audio visual events; investigates modality allocation in intelligent multimodal presentation systems taking into account the cognitive impacts of modality on human information processing; provides an overview on gesture control technologies for CE; presents systems for natural human computer interaction; virtual content insertion and human action retrieval; examines techniques for 3D face pose estimation; physical activity recognition and video summary quality evaluation; discusses the features that characterize

the new generation of CE and examines how web services can be integrated with CE products for improved user experience This book is an essential resource for researchers and practitioners from both academia and industry working in areas of multimedia analysis human computer interaction and interactive user interfaces Graduate students studying computer vision pattern recognition and multimedia will also find this a useful reference *Commerce Business Daily*, 1998-08 The GPS Manual Steve Dye, Frank Baylin, 1997 *A GPS User Manual* Dale Depriest, 2003 This manual is a complete user manual for Garmin handheld receivers It covers theory and practical applications for gps technology and the receivers that use this technology Representative products for all of the Garmin handheld receivers past and present are explained and tips are given on getting the most out of each model It is designed to augment the user manuals that are supplied with each product but is complete enough to replace them While this manual is Garmin specific it provides a basic understanding of gps devices that is applicable to any gps receiver It was written over a period of 4 years and has been reviewed and tested by hundreds of users over that period It has been used as the reference for training on gps usage Because of its unique approach that develops the theory behind operation as well as specific details it provides a basis that will allow a user to be able to use any gps receiver Skills in the use of a gps will provide assurance and safety for the user Topics extend beyond just operating the unit to actually being able to use it for navigation on the land in the sea or in the air Topics are applicable whether you are hiking or driving to your destination These topics include product operation waypoints routes tracklogs navigation maps and databases product selection features theory accessories and product unique functions **GPS For Dummies** Joel McNamara, 2007-05-29 GPS For Dummies gives new meaning to finding yourself In fact with a GPS global positioning system receiver you can determine precisely where you are anywhere on this planet If you are planning on buying a GPS receiver or if you have one and want to get your money's worth this guide tells you what you need to know including Basic GPS principles and concepts such as waypoints routes tracks and coordinate systems Recommended features for GPS receivers to be used in various types of activities including hiking mountain biking cross country skiing geocaching hunting ATVing mapping and more How to do digital mapping on your computer including software packages you can use to work with aerial photos topographic maps and road maps The main providers of digital map data for the U S and their Web sites The scoop on geocaching a high tech treasure hunt Written by Joel McNamara avid outdoorsman adventure racer search and rescue team member and author of *Secrets of Computer Espionage* GPS for Dummies is ideal for both ordinary travelers and exotic explorers It covers a world of GPS info such as Choosing features for a GPS receiver including the screen an alarm built in maps an electric compass an altimeter antennas interface modes and more Systems for traveling on the main roads and systems for exploring off the beaten path Using GPS with a PDA personal digital assistant Computer requirements for different mapping choices Topographic map software from Maptech DeLorme and National Geographic that's for off road use Using Web hosted mapping services including street maps topographic maps aerial photos and U S government produced
