

Experimental Probability

Suppose you select a marble 20 times from the bag shown, replacing it each time. You select a black marble 10 times. Which is greater—the theoretical probability or the experimental probability?

Complete the table for $P(\text{black})$.

Step 1: Write the **theoretical probability** as a ratio, decimal, and percent.

$$\frac{\text{black possible}}{\text{possible outcomes}} = \frac{7}{10} = 0.7 = 70\%$$

Step 2: Set up a proportion.

$$\frac{\text{black possible}}{\text{possible outcomes}} = \frac{\text{unknown amount}}{\text{trials}}$$

$$\frac{7}{10} = \frac{n}{20}$$

Step 3: Solve the proportion for n .

You **expect** to select the black marble 14 times out of 20.

$$140 = 10n$$

$$n = 14$$

Step 4: Write a fraction that relates the **actual results** to the possible outcomes. This is the **experimental probability**.

$$\frac{10}{20} = \frac{1}{2} = 0.5 = 50\%$$

Compare the results.

So, the theoretical probability is greater than the experimental probability.

$$70\% > 50\%$$

Complete the table for each probability experiment. Write each probability as a ratio, a decimal, and a percent.

1. Toss two number cubes and get a sum of 5, $P(\text{sum of 5})$.

Theoretical Probability	Number of Trials	Expected Results	Actual Results	Experimental Probability
$\frac{4}{36} = \frac{1}{9}$	15	$P(\text{sum of 5}) = \frac{x}{15}$ $x = ?$	sum of 5	

2. Repeat Exercise 1, but complete 50 trials.

Theoretical Probability	Number of Trials	Expected Results	Actual Results	Experimental Probability
$\frac{4}{36} = \frac{1}{9}$	50		sum of 5

Diversifying Mathematics Teaching: Advanced Educational Content And Methods For Prospective Elementary Teachers
Sergei Abramovich, 2017-02-24 What one takes away from this book is the notion that there is a lot of potential to do more with these students and the book stands as a resource for anyone who shares that opinion Books like Abramovich's are a welcome addition to our options as we try to do our best by these students and by extension their future students MAA Reviews The book is written to enhance the preparation of elementary teacher candidates by offering teaching ideas conducive to the development of deep understanding of concepts fundamental to the mathematics curriculum they are to teach It intends to show how the diversity of teaching methods stems from the knowledge of mathematics content and how the appreciation of this diversity opens a window to the teaching of extended content The book includes material that the author would have shared with teacher candidates should there have been more instructional time than a 3 credit hour master's level course Elementary Mathematics Content and Methods provides Thus the book can supplement a basic

textbook for such a course by extending content and diversifying methods Also the book can support graduate level mathematics education programs which have problem solving seminars courses in their curriculum The book is well informed with available in English the mathematical standards and recommendations for teachers from Australia Canada Chile England Japan Korea Singapore and the United States The Math We Need to Know and Do in Grades 6-9 Pearl Gold Solomon, 2007-05-31 Expertly connects state and national standards to examples from our curriculum With this text you can be sure that you are teaching what you are expected to teach Kimberly Puckett Math Teacher Tri Village Junior Senior High School New Madison OH An excellent practical and well organized resource for planning math lessons that address content standards found in all state curriculum frameworks Anne Roede Giddings Assistant Superintendent Ansonia Public Schools CT Does a wonderful job of connecting mathematical objectives with instructional techniques and real world applications Makes a valuable contribution to the field by integrating multiple resources and linking content and pedagogy Edward C Nolan Mathematics Department Chair Albert Einstein High School Kensington MD A simple to follow matrix helps you align activities problems and assessments with NCTM standards In a new edition of her standards based math workbook award winning author Pearl Gold Solomon covers essential concepts and skills as defined by the National Council of Teachers of Mathematics for learners in middle schools Designed as a comprehensive resource for planning curriculum instruction and assessment The Math We Need to Know and Do in Grades 6 9 Second Edition offers a quick reference simple to follow matrix covering the sequential and specific development of concepts across grade levels Responding to the current climate of accountability and new findings on how the brain works and how students learn this updated and expanded handbook covers content standards and provides guidelines for formal and informal assessments Teachers and instructional leaders will find practical tools that include Concept statements and scaffolds for building student understanding Suggestions for working with manipulatives calculators Web sites and educational software and graphics programs Ready to use sample activities problems and assessments Ideal for teachers as well as math coaches curriculum directors and assessment specialists this invaluable text presents authoritative and detailed guidance for strengthening curriculum development and instruction
