Grammar Of Dolakha Newar Mouton Grammar Library 40:

A Grammar of Dolakha Newar Carol Genetti, 2009-02-26 A Grammar of Dolakha Newar is the first fully comprehensive reference grammar of a Newar variety Dolakha Newar is of particular interest as it is member of the mutually unintelligible eastern branch of the family so allows for an important comparative perspective on this significant Tibeto Burman language In addition to a chapter on phonetics and phonology the book contains a separate chapter on prosody There are also distinct chapters on each word class with full discussion of the morphological and syntactic properties of each class The book provides an extensive study of syntax including complete chapters on constructions clause structure constituent order grammatical relations nominalization complementation the participial construction and the complex sentence as well as a detailed chapter on tense and aspect Brimming with examples from natural discourse the book couples rigorous description of the language s structures with full discussion of how the structures are used in connected speech Each analysis is presented with full argumentation and competing analyses are contrasted and discussed The result is a rich readable and beautifully argued portrait of a language and how it works

Handbook of Descriptive Linguistic Fieldwork Shobhana L. Chelliah, Willem J. de Reuse, 2010-10-06 The Handbook of Descriptive Linguistic Fieldwork is the most comprehensive reference on linguistic fieldwork on the market bringing together all the reader needs to carry out successful linguistic fieldwork Based on the experiences of two veteran linguistic fieldworkers and advice from more than a twenty active fieldwork researchers this handbook provides an encyclopedic review of current publications on linguistic fieldwork and surveys past and present approaches and solutions to problems in the field and the historical political and social variables correlating with fieldwork in different areas of the world The discussion of the ethical dimensions of fieldwork as well as what constitutes the typical linguistic fieldwork setting or consultant is explored from multiple perspectives relevant to fieldwork on every continent Included is information omitted in most other texts on the subject such as the collection representation management and methods of extracting grammatical information from discourse and conversational data as well as the relationship between questionnaire based elicitation text based elicitation and philology and the need for combinations of these methods The book is useful before during and after linguistic field trips since it provides extensive practical macro and micro organization and planning fieldwork tips as well as a handy sketch of major typological features for use in linguistic analysis Comprehensive references are provided at the end of each chapter as resources relevant to the reader s particular interests

Himalayan Languages and Linguistics , 2011-04-21 Himalayan Languages and Linguistics gathers together nine outstanding and original contributions on the Tibeto Burman and Indo Aryan languages of this important and culturally diverse mountainous area Filling a marked gap in our understanding of the languages of this underdocumented region the collection offers a snapshot of the state of the field of Himalayan language research and linguistic comparison Drawing on primary fieldwork in China India Nepal and Pakistan as well as on comparative sources the new analyses outlined in these

contributions will interest a readership of linguists philologists anthropologists historians lexicographers and specialists in the languages and cultures of Inner and South Asia Contributions cover topics as diverse as linguistic palaeontology orthographical standardisation dialectology phonology morphology semantics and syntax *The Sino-Tibetan Languages* Graham Thurgood, Randy J. LaPolla, 2016-12-08 There are more native speakers of Sino Tibetan languages than of any other language family in the world Our records of these languages are among the oldest for any human language and the amount of active research on them has multiplied in the last few decades Now in its second edition and fully updated to include new research The Sino Tibetan Languages includes overview articles on individual languages with an emphasis on the less commonly described languages as well as descriptions and comments on the subgroups in which they occur There are overviews of the whole family on genetic classification and language contact syntax and morphology and also on word order typology There are also more detailed overview articles on the phonology morphosyntax and writing system of just the Sinitic side of the family Supplementing these overviews are articles on Shanghainese Cantonese and Mandarin dialects Tibeto Burman is reviewed by genetic or geographical sub group with overview articles on some of the major groups and areas and there are also detailed descriptions of 41 individual Tibeto Burman languages written by world experts in the field Designed for students and researchers of Asian languages The Sino Tibetan Languages is a detailed overview of the field This book is invaluable to language students experts requiring concise but thorough information on related languages and researchers working in historical typological and comparative linguistics **A Grammar of Bunan** Manuel Widmer, 2017-09-11 This book provides a comprehensive grammatical description of Bunan a Tibeto Burman languages that is spoken by approximately 4 000 people in the North Indian Himalayas The grammar offers a systematic analysis of a wide range of grammatical phenomena ranging from phonetics and phonology to complex syntactic constructions Moreover it contains a wealth of historical annotations annotated texts and a Bunan English glossary **A Grammar of Darma** Christina Willis Oko, 2019-08-26 A Grammar of Darma provides the first comprehensive description of this Tibeto Burman language spoken in Uttarakhand India The analysis is informed by a functional typological framework and draws on a corpus of data gathered through elicitation observation and recordings of natural discourse Every effort has been made to describe day to day language so whenever possible illustrative examples are taken from extemporaneous speech and contextualized Sections of the grammar should appeal widely to scholars interested in South Asia s languages and cultures including discussions of the socio cultural setting the sound system morphosyntactic clause and discourse structure The grammar s interlinearized texts and glossary provide a trove of useful information for comparative linguists working on Tibeto Burman languages and anyone interested in the world s less commonly spoken languages Syntax - Theory and Analysis. Volume 3 Tibor Kiss, Artemis Alexiadou, 2015-03-10 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the

interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discuss do not only serve to show syntactic analyses but also to compare theoretical approaches with each other

Nominalization in Asian Languages Foong Ha Yap, Karen Grunow-Hårsta, Janick Wrona, 2011-06-29 Research on nominalization a process that gives rise to referring expressions has always played a central role in linguistic investigations Over the years there has also been growing evidence that nominalization constructions often extend to non referential domains They participate in noun modifying expressions e g genitive and relative clauses subordinate clauses and topic constructions finite structures with the nominalizers reanalyzed as TAM markers and stance constructions with evaluative attitudinal evidential and epistemic overtones This volume brings together historical and crosslinguistic evidence from more than 20 different languages representing six different language families spanning the Asian continent and the Pacific and Indian oceans to elucidate the strategies and grammaticalization pathways that give rise to both referential and non referential uses of nominalization constructions This collection highlights the diversity of strategies and at the same time the robust cyclical nature of change within and across languages The combined diachronic and typological analyses in this volume are particularly valuable for linguistic research on diachronic morphosyntax and linguistic universals and are also an important supplementary cross referencing tool for linguistic investigations of versatile and ubiquitous morphemes in under documented languages

The Oxford Handbook of Ergativity Jessica Coon, Diane Massam, Lisa deMena Travis, 2017-06-15 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction

related constructions such as the anti passive related properties such as split ergativity and word order and extensions and permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns

Agreement from a Diachronic Perspective Jürg Fleischer, Elisabeth Rieken, Paul Widmer, 2015-06-16 The contents of the present volume will enhance our understanding of the diachrony of agreement systems and provide a useful starting point for future studies on this both fascinating and intricate field of research

Participles Ksenia Shagal, 2019-11-05 The book is the first large scale typological study of participles based on data from more than 100 languages Its main aim is to model the diversity of non finite verb forms involved in adnominal modification Participles are examined with respect to several morphological and syntactic parameters and are shown to be a versatile cross linguistic category The book is of interest to language typologists and descriptive linguists

Egophoricity Simeon Floyd, Elisabeth Norcliffe, Lila San Roque, 2018-04-15 Egophoricity refers to the grammaticalised encoding of personal knowledge or involvement of a conscious self in a represented event or situation Most typically a marker that is egophoric is found with first person subjects in declarative sentences and with second person subjects in interrogative sentences This person sensitivity reflects the fact that speakers generally know most about their own affairs while in questions this epistemic authority typically shifts to the addressee First described for Tibeto Burman languages egophoric like patterns have now been documented in a number of other regions around the world including languages of Western China the Andean region of South America the Caucasus Papua New Guinea and elsewhere This book is a first attempt to place detailed descriptions of this understudied grammatical category side by side and to add to the cross linguistic picture of how ideas of self and other are encoded and projected in language The diverse but conceptually related egophoric phenomena described in its chapters provide fascinating case studies for how structural patterns in morphosyntax are forged under intersubjective interactional pressures as we link elements of our speech to our speech situation

Objects and Information Structure Mary Dalrymple, Irina Nikolaeva, 2011-06-02 A cross linguistic study of how objects are affected by information structure

The Morphology and Phonology of Exponence Jochen Trommer, 2012-09-27 Addressing the common problems questions and solutions of exponence this book contains contributions from leading specialists who formulate a coherent research programme which integrates the central insights of the last decades and provides challenges for the future

Buddhist Manuscript Cultures Stephen C. Berkwitz, Juliane Schober, Claudia Brown, 2009-01-13 Buddhist Manuscript Cultures explores how religious and cultural practices in premodern Asia were shaped by literary and artistic traditions as well as by Buddhist material culture This study of Buddhist texts focuses on the significance of their material forms rather

than their doctrinal contents and examines how and why they were made Collectively the book offers cross cultural and comparative insights into the transmission of Buddhist knowledge and the use of texts and images as ritual objects in the artistic and aesthetic traditions of Buddhist cultures Drawing on case studies from India Gandhara Sri Lanka Thailand Mongolia China and Nepal the chapters included investigate the range of interests and values associated with producing and using written texts and the roles manuscripts and images play in the transmission of Buddhist texts and in fostering devotion among Buddhist communities Contributions are by reputed scholars in Buddhist Studies and represent diverse disciplinary approaches from religious studies art history anthropology and history This book will be of interest to scholars and students working in these fields
