Guidelines for the Assessment of General Damages in Personal Injury Cases Great Britain. Judicial Studies Board, John Cherry, 2004 The first edition of this title was regarded as a landmark publication in personal injury practice Each succeeding edition has built on this reputation and the book has now firmly established itself as essential reading for all those involved in the area of personal injury The Guidelines are designed to provide a clear and logical framework for the assessment of damages while leaving the discretion of the assessor unfettered since every case must depend to a degree on its own facts They provide an invaluable guide to all those involved in personal injury litigation solicitors barristers insurance companies trade unions and the medical defence organizations As with previous editions all judges involved in hearing personal injury cases will automatically receive a copy of the book This seventh edition has been fully updated to take account of inflation and decisions made in the two years since the previous edition The figures will be increased to take into account the RPI

Post Traumatic Stress Disorder and the Law Trevor Hicks, 2003 Nervous shock cases form an area of law which illustrates well the operation of judicial policy. It is possible from such cases to trace the changing attitudes of lawyers doctors and of society in general to psychiatric injury over the last century. These cases also highlight the changing judicial attitudes to the scope of duty of care and to the whole issue of policy decisions. The recognition of nervous shock similarly illustrates the development of medical knowledge in relation to psychiatric injury. The recognition of Post traumatic Stress Syndrome PTSD has been a relatively new and controversial phenomenon and this disorder has now been incorporated into the various classifications of mental disorder as a recognisable psychiatric illness. This book examines the development of the law and medical knowledge in relation to cases of nervous shock and in particular to PTSD. The expansion and subsequent contraction of liability is shown to be dynamic in nature as both legal and medical knowledge have increased. The intention of this book is to provide a concise review of the law comparing it to current medical knowledge in relation to PTSD. The book is intended to be of use to professionals involved in psychiatric injury cases who require an up to date understanding of PTSD.

Guidelines for the Assessment of General Damages in Personal Injury Cases Judicial Studies Board, 2000 This fifth edition has undergone a major review to take account of the recent decision of the Court of appeal in *Heil v Rankin* 2000 2 WLR 1173 which made principled increases in the level of personal injury awards over £10 000. In arriving at the guidelines given the authors have also distilled the important decisions of the courts since the publication of the last edition and amended the figures to take into account the inflationary rise of the past two years. The Guidelines are designed to provide a clear and logical framework for the assessment of damages while leaving the discretion of the assessor unfettered since every case must depend to a degree on its own facts. They provide a guide to all those involved in personal injury litigation solicitors barristers insurance companies trade unions and the medical defence organizations. A copy of the book will be sent to every judge who hears civil court cases.
