ensure environmental values are properly integrated into the decision making process ANSEA was developed to contribute to the systematic integration of environmental protection objectives in strategic decision making which in turn will contribute to the promotion of sustainable development The method can be applied to analyse how environmental and sustainability issues are addressed in decision making processes at both the national and local level for a variety of different policies Importantly the focus is on evaluating the decision making process itself rather than the quantitative output of an assessment With explicatory examples and practical case studies the distinguished interdisciplinary authors clearly illustrate how a decision centred approach to environmental assessment can be successfully achieved At a time when a new European directive requires the implementation of strategic environmental assessment SEA into all relevant decision making processes this timely book will be required reading for environmental policymakers in all EU member states It will also be a valuable source of information and reference for researchers academics and consultants in the fields of planning environmental evaluation and environmental management
