ICT for Health Science Research Amnon Shabo (Shvo), Inge Cort Madsen, Hans-Ulrich Prokosch, Kristiina Häyrynen, Klaus-Hendrik Wolf, Fernando Martin-Sanchez, Matthias Löbe, 2019-04-15

Information and Communications Technology (ICT) is used in healthcare and health science research in application domains such as clinical trials and the development of drug and medical devices as well as in translational medicine with the aim of improving prevention, diagnosis and interventions in health and care. This book presents accepted papers from the 2019 European Federation of Medical Informatics conference EFMI STC 2019 held in Hanover, Germany from 7-10 April 2019. More than 90 submissions were received from which, after review, the Scientific Program Committee (SPC) accepted 50 full papers to be included in this volume of proceedings. In addition, 16 poster presentations were accepted. This year, ICT for Health Science Research was selected as the focus topic and the conference also honors Prof. Peter Leo Reichertz (1930-1987), one of the founding fathers of ICT in healthcare and an originator of the term Medical Informatics. The conference focuses on recent research data privacy, interoperability, data-driven decision support, mobile data capture and ICT for clinical trials. The book will be of interest to all healthcare researchers and practitioners whose work involves the use of ICT.

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1992 XII Mediterranean Conference on Medical and Biological Engineering and Computing 2010 Nicolas Pallikarakis, Panagiotis D. Bamidis, 2010-05-28

Over the past three decades, the exploding number of new technologies and applications introduced in medical practice, often powered by advances in biosignal processing and biomedical imaging, created an amazing account of new possibilities for diagnosis and therapy but also raised

major questions of appropriateness and safety The accelerated development in this field alongside with the promotion of electronic health care solutions is often on the basis of an uncontrolled diffusion and use of medical technology The emergence and use of medical devices is multiplied rapidly and today there exist more than one million different products available on the world market Despite the fact that the rising cost of health care partly resulting from the new emerging technological applications forms the most serious and urgent problem for many governments today another important concern is that of patient safety and user protection issues that should never be compromised and expelled from the Biomedical Engineering research practice agenda

Health Technology Literacy: A Transdisciplinary Framework for Consumer-Oriented Practice Maryalice Jordan-Marsh, 2010-08-31 Health Technology Literacy is a must read for anyone who cares about the future of health and health care and how technology is already shaping a new consumer oriented vision of that future As one of today's leading scholars in the area of consumer facing health technologies Dr Jordan Marsh has written a book that helps the rest of us understand how taking better care of ourselves is being played out in the digital age Katharyn A May DNSc RN FAAN Professor and Dean School of Nursing University of Wisconsin Madison Book Jacket **PROP - Healthcare Information Systems Custom E-Book** Anthem, 2014-05-05 PROP Healthcare Information Systems Custom E Book **Personal Medical Information** Ross Anderson, 2012-12-06 In the last few years the protection of computerised medical records and of other personal health information has become the subject of both technical research and political dispute in a number of countries In Britain the issue arose initially as an argument between the British Medical Association and the Department of Health over whether encryption should be used in a new medical network In Germany the focus was the issue to all patients of a smartcard to hold insurance details and facilitate payment while in the USA the debate has been whether federal law should preempt state regulation of computerised medical records and if so what technical and legal protection should be afforded the patient Whatever the origin and evolution of this debate in specific countries it has become clear that policy and technical matters are closely intertwined What does computer security mean in the medical context What are we trying to do What are the threats that we are trying to forestall What costs might reasonably be incurred To what extent is the existing technology largely developed to meet military and banking requirements of use And perhaps hardest of all what is the right balance between technical and legal controls As the debate spread it became clear that there was little serious contact between the people who could state the requirements clinical professionals medical ethicists and patients and the people who could explore how to meet
