**The Dīpavaṃsa** ,1879      **Autocar** ,1998      Microbial Processes National Academy of Sciences,2001-09

Microorganisms have simultaneously served and assaulted man throughout history Man is totally dependent on some  
microbes for life processes while remaining subject to the destructive capacities of others in diseases not yet conquered  
Microbes can be marshaled to aid in solving many important global problems including food shortages resource recovery and  
reuse energy shortages and pollution Microbiology is particularly suited to make important contributions to human needs in  
developing countries yet it has received comparatively little attention The range of possible applications covers uses by  
individuals and industries in rural settings villages and cities This book covers examples of microbial processes that may be  
useful in developing countries Although many of these processes may not have a direct and immediate use their scope and  
diversity should serve to indicate the strong potential for microbial applications      *Dīpavaṃsa* Hermann Oldenberg,1879

**Phytoremediation** David Tsao,2003-02-12 This volume provides a general overview of phytotechnologies Authors from  
private industry academia the consulting community and regulatory agencies have all contributed to it Starting with the  
basic processes and mechanisms occurring in the soil plant atmosphere continuum the typical applications of vegetation for  
cleaning up and remediating contaminated sites are described Since the growth of vegetation is paramount to this  
technology the factors within the subsurface environment affecting growth are discussed in detail as well These include the  
processes and factors in the soil environment that affect the plant and the subsurface microbial community After these two  
introductory chapters the most prevalent applications of phytotechnologies are reviewed These include vegetated systems for  
treating organic and inorganic contaminants in solid media hydraulic systems for controlling and treating contaminant  
groundwater plumes and vegetative covers for surface water protection and landfill leachate management Finally this  
monograph concludes with a discussion of the regulatory implications of applying this technology towards the clean up and  
remediation of contaminated sites worldwide Pages ix x      **The Autocar** ,1988-06      *Road and Track* ,2002
