R. Bowker LLC, 2004 [Case studies on food waste quantification, characterization, and identification of prevention and reduction options in Colombo, Sri Lanka](#) Food and Agriculture Organization of the United Nations, 2023-07-11 Food waste FW is a key challenge on the sustainable development agenda of countries worldwide The lack of FW data and insights from its analysis about quantities causes and characteristics is a significant obstacle in implementing adequate reduction and prevention interventions for different sectors The primary purpose of the case studies was to review FW prevention reduction and management initiatives Lessons and best practices that enable and facilitate solutions were identified Nine case studies were conducted targeting five sectors food services one restaurant and one hotel wholesale markets one fruits and vegetables wholesale market retailers one retail market one retail shop and one supermarket caterers one hospital and households five middle and five high income households The case studies consisted of a FW audit that measured the amounts generated from various processes and identified drivers causes and current best practices Quantification involved physical separation weighing and categorizing the different food components The separation classified quantities into edible and inedible portions The study also focused on assessing the environmental and socio impacts based on assessed and categorized FW quantities FW is a complex phenomenon where the amount causes and consequences are contextually different It is not easy to compare and contrast country level data and the individual actors in the same country Therefore the case study approach has been used in many FW related studies Multiple case studies can be expensive and time consuming to implement Under this study we analyzed nine case studies targeting five sectors food services four restaurants a dessert shop and one hotel wholesale markets one fruit and vegetable market retail markets one supermarket one fruit and vegetable retailer one Dedicated Economic Center caterers institutional canteens one hospital and

households five middle income households and five low income households Entities were selected based on willingness to participate and an actual FW reduction need **Healthy Eating and Active Lifestyles Best Practices in Public Health** OECD,2022-06-07 Overweight and obesity affects over half of all men and women in OECD countries This has significant health and economic consequences As part of OECD s work on promoting best practices in public health this report outlines policy recommendations on how to address two leading overweight risk factors poor diet and lack of physical activity

Near East and North Africa - Regional Overview of Food Security and Nutrition, 2022 Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, United Nations Children's Fund, World Food Programme, World Health Organization, United Nations Economic and Social Commission for West Asia, 2023-03-29 This year's report presents evidence that Arab States face significant challenges in achieving Sustainable Development Goal 2 targets related to hunger food security and nutrition as undernourishment moderate or severe food insecurity and malnourishment are increasing Child wasting and overweight are higher and adult obesity is double the global average LDCs and conflict affected countries suffer from even more severe hunger and malnutrition including child stunting wasting and women's anaemia The report also provides the first assessment of the cost and affordability of a healthy diet since the outbreak of the COVID 19 pandemic which shows a growing trend in the price of nutritious diets in recent years and that more than half the Arab population cannot afford a healthy diet The Ukraine crisis which has triggered food shortages and increased food price inflation further adds to the burden on the region This year the report focuses on how trade can enable regional food security and nutrition Arab countries rely significantly on imports for the essential food items necessary for diverse and healthy diets that they cannot locally produce in sufficient quantities due to limited natural resource endowments It discusses the role of

trade and trade facilitation as essential enablers of all four dimensions of food security and nutrition It also underlines how tariffs and non tariff measures influence the economic access to food in the area On the other hand countries that depend on trade may become more exposed to outside shocks as the pandemic and the Ukraine crisis have highlighted The report assesses Arab countries vulnerabilities such as import dependency and lack of supplier diversification To reduce the exposure to such external shocks international trade must be carefully managed sources of imports should be diversified and international trade relations must be expanded to include new partners and markets The report concludes with further policy recommendations that aim for the better integration of trade into food security and nutrition policies in the region **Quick**
