Outcome-Based Performance Management in the Public Sector Elio Borgonovi,Eugenio Anessi-Pessina,Carmine Bianchi,2017-07-17 This book highlights the use of an outcome oriented view of performance to frame and assess the desirability of the effects produced by adopted policies so to allow governments not only to consider effects in the short but also the long run Furthermore it does not only focus on policy from the perspective of a single unit or institution but also under an inter institutional viewpoint This book features theoretical and empirical research on how public organizations have evolved their performance management systems toward outcome measures that may allow one to better deal with wicked problems Today wicked problems characterize most of governmental planning involving social issues These are complex policy problems underlying high risk and uncertainty and a high interdependency among variables affecting them Such problems cannot be clustered within the boundaries of a single organization or referred to specific administrative levels or ministries They are characterized by dynamic complexity involving multi level multi actor and multi sectoral challenges In the last decade a number of countries have started to develop new approaches that may enable to improve cohesion to effectively deal with wicked problems The chapters in this book showcase these approaches which encourage the adoption of more flexible and pervasive governmental systems to overcome such complex problems Outcome Based Performance Management in the Public Sector is divided into five parts Part 1 aims at shedding light on problems and issues implied in the design and implementation of outcome based performance management systems in the public sector Then Part 2 illustrates the

experiences problems and evolving trends in three different countries Scotland USA and Italy towards the adoption of outcome based performance management systems in the public sector Such analyses are conducted at both the national and local government levels The third part of the book frames how outcome based performance management can enhance public governance and inter institutional coordination Part 4 deals with the illustration of challenges and results from different public sector domains Finally the book concludes in Part 5 as it examines innovative methods and tools that may support decision makers in dealing with the challenges of outcome based performance management in the public sector Though the book is specifically focused on a research target it will also be useful to practitioners and master students in public administration

**Research Challenges in Modeling and Simulation for Engineering Complex Systems** Richard Fujimoto, Conrad Bock, Wei Chen, Ernest Page, Jitesh H. Panchal, 2017-08-18 This illuminating text reference presents a review of the key aspects of the modeling and simulation M outlines research issues relating to conceptual modeling covering the development of explicit and unambiguous models communication and decision making and architecture and services considers key computational challenges in the execution of simulation models in order to best exploit emerging computing platforms and technologies examines efforts to understand and manage uncertainty inherent in M discusses the reuse of models and simulations to accelerate the simulation model development process This thought provoking volume offers important insights for all researchers involved in modeling and simulation across the full spectrum of disciplines and applications defining a common research agenda to support the entire M S research community

**Autonomous Agents and Multiagent Systems** Nardine Osman, Carles Sierra, 2016-09-23 This book constitutes the most visionary papers of the AAMAS 2016 Workshops held in Singapore Singapore in May 2016 The 12 revised full papers presented were carefully reviewed and selected from the 12 workshops They cover specific topics both theoretical and applied in the general area of autonomous agents and multiagent systems

*Multi-Agent Based Simulation XVII* Luis Gustavo Nardin, Luis Antunes, 2017-10-03 This book constitutes the thoroughly refereed post conference proceedings of the 17th International Workshop on Multi Agent Based Simulation MABs 2016 held in Singapore in May 2016 The workshop was held in Conjunction with the 15th International Conference on Autonomous Agents and Multi Agent Systems AAMAS 2016 The 10 revised full papers included in this volume were carefully selected from 15 submissions The topic of the papers is about modeling and analyzing multi agent systems and applying agent based simulation techniques to real world problems focusing on the confluence of socio technical natural sciences and multi agents systems with a strong application empirical vein Special emphasis is given on exploratory agent based simulation as a principled way of undertaking scientific research in the social sciences and on using social theories as an inspiration to new frameworks and developments in multi agent systems

**Joining Complexity Science and Social Simulation for Innovation Policy** Petra Ahrweiler, Nigel Gilbert, Andreas Pyka, 2016-04-26 This book explores how complexity science and social simulation can be used to improve and inform policy

making in both research and innovation Beginning with an introduction to conceptual definitions of complexity science and social simulation the book demonstrates the validity of the underlying integrated research framework used throughout It is then divided into two parts with the first investigating the effects and impacts of policy making on the structure composition and outputs of research and innovation networks using the agent based SKIN platform Simulating Knowledge Dynamics in Innovation Networks <http://cress.soc.surrey.ac.uk/SKIN/> The second half of the book discusses a research initiative funded by the Irish government focusing on innovation policy simulation for economic recovery This consists of empirical research on Irish research and innovation networks and SKIN based simulations of technology transfer issues and the commercialization of research in areas with high potential for innovation and economic growth The book concludes with reflections on the maturity and utility of an approach combining complexity science and social simulation for research and innovation policy

Joining Complexity Science and Social Simulation for Innovation Policy will be of particular interest to scientists concerned with innovation and complex systems including economists sociologists and complexity researchers as well as students and practitioners such as innovation policymakers and innovation business managers

[Innovation Networks for Regional Development](#) Ben Vermeulen, Manfred Paier, 2016-09-29 This book brings together original research on the role of networks in regional economic development and innovation It presents a comprehensive framework synthesizing extant theories a palette of real world cases in the aerospace automotive life science biotechnology and health care industries and fundamental agent based computer models elucidating the relation between regional development and network dynamics The book is primarily intended for researchers in the fields of innovation economics and evolutionary economic geography and particularly those interested in using agent based models and empirical case studies However it also targets regional innovation policy makers who are not only interested in policy recommendations but also want to understand the state of the art agent based modeling methods used to experimentally arrive at said recommendations

Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
