Background Depth Set how deep into the model you want to see by using object masks or fog

Camera Perspective Position your camera to the view you want to see and configure your field of view and perspective settings

Style Determine how your model will look This includes render settings for the faces and edges in your model but also includes specialty settings like watermarks guides and section planes Not only will you understand exactly what those five points are you'll learn multiple ways to control them Using these methods you will gain complete control over
